

Dishwasher Quick Start Guide

OPERATING INSTRUCTIONS

⚠ WARNING

Tip Over Hazard

Do not use dishwasher until completely installed.

Do not push down on open door.

Doing so can result in serious injury or cuts.

WARNING: To reduce the risk of fire, electric shock, or injury to persons, read the IMPORTANT SAFETY INSTRUCTIONS, located in your appliance's Owner's Manual, before operating this appliance.

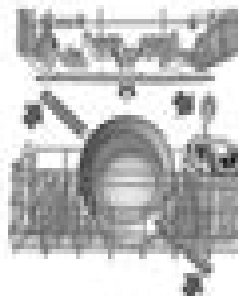

Step 1. Prepare and Load the Dishwasher

See the Key Usage Tips for more information on loading the dishwasher.

Step 2. Add Detergent and Rinse Aid to the Dishwasher

See the Key Usage Tips for more information on adding detergent and rinse aid.

Step 3. Check that All Arms Spin Freely

Items in the rack can block the spray arms.

Step 4. Select a Cycle and Options if Desired

Efficient dishwashers run longer to save water and energy, just as driving a car slower saves on gas. Typical cycle time is approximately 3 1/2 hours, but can take less or more time to complete depending on selections.

You can customize your cycles by selecting the options desired. If you change your mind, select the option again to turn off the option. Not all options are available for every cycle. If an invalid option is selected for a given cycle, the lights will flash. Adding options may increase the cycle time.

NOTE: Cycles and Options vary by model, see online Cycle and Options Guide for more information.

Step 5. Start or Resume a Cycle

IMPORTANT: If anyone opens the door (such as for adding a dish, even during the Delay Hours option), the Start/Resume button must be selected each time.

- If the Start/Resume button is located on top of door, push the door firmly closed within 4 seconds of selecting Start/Resume. If door is not closed within 4 seconds, the Start/Resume button LED will flash, an audible tone will be heard, and cycle will not start.
- If the Start/Resume button is located on front of door, push door firmly closed. The door latches automatically, select the wash cycle, options, and then Start/Resume.

NOTE: Run hot water at the sink nearest your dishwasher until the water is hot. Turn off water.

NOTE: Select Start/Resume every time you add a dish.

Cycle Guide

This information covers several different models. Your dishwasher may not have all of the cycles and options described.

Cycles	Descriptions
Sensor	This cycle senses the load size, soil amount, and toughness of soil to adjust the cycle for improved cleaning using only the amount of water and energy needed. This cycle may be automatically selected if you first select Start and includes a heated drying option.*
Heavy	Use for hard-to-clean, heavily soiled pots, pans, casseroles, and regular tableware. Includes a heated drying option.
Normal	This cycle is recommended for daily, regular, or typical use to completely wash and dry a full load of normally soiled dishes. This dishwasher's government energy certifications were based on the Normal cycle with only the Heat Dry option selected.**
1-Hr Wash	For fast results, this cycle will clean dishes using slightly more water and energy. For improved drying, select a heated drying option. NOTE: Some detergents are not recommended for short wash-cycles, please refer to your detergent packaging for more information.
Soak & Clean	This cycle gently soaks dishes with an extended prewash which eliminates the need to prewash dishes, saving personal time and effort. For optimal cleaning results during this cycle, add prewash detergent. Use this cycle for loads with heavy amounts of dried-on or hard-to-clean based-on food. This cycle includes a heated drying option.

*The government energy certifications are not based on this cycle and may increase your energy usage. See the Normal cycle description for the government energy certification cycle.

**No other washing and drying temperature options were selected, and the dishwasher was not subjected to truncated testing. Rinse aid was not used, and there was no detergent used in the prewash.
