A Book about Books E.H. Bernstein,2018-11-26 A Book about Books discusses what nonfiction books and subjects the author believes are important to know about This book is volume I of III Only the first volume is available at this time The second volume is forthcoming and will be available in 2020 E H Bernstein is a former librarian turned author The subtitle of the book describes the author s objective A handbook in 3 parts to a choice of essential books writers and subjects in order to understand the world we live in about big questions and possible answers about books and writers that may improve people s lives about neglected writers and other books and subjects A Book about Books attempts to share what the author has learned from nearly 50 years of nonfiction reading and to provide the reader with samples of the most important authors and subjects from that reading While the book is based on research it is intended to be a handbook or guide by trying to make that research understandable to the general reader and to students and for teachers by pointing to what the author believes is missing from today s education Note about how the volumes are related each chapter is on a separate subject So the chapters can be read individually but the full message requires reading all the volumes Volume I is important but preliminary to the more important Volumes II and III A future website bookaboutbooks com is planned for later in 2019 and will include additional material not in the books Note also that the book is not just about books since other sources are also mentioned This book tries to point to problems in how we live and to see if books have any answers A contemporary writer once said that one of the purposes of writing is that books should be useful I hope that my book will be of use

Model-Based Machine Learning John Winn,2023-11-30 Today machine learning is being applied to a growing variety of problems in a bewildering variety of domains A fundamental challenge when using machine learning is connecting the abstract mathematics of a machine learning technique to a concrete real world problem This book tackles this challenge through model based machine learning which focuses on understanding the assumptions encoded in a machine learning system and their corresponding impact on the behaviour of the system The key ideas of model based machine learning are introduced through a series of case studies involving real world applications Case studies play a central role because it is only in the context of applications that it makes sense to discuss modelling assumptions Each chapter introduces one case study and works through step by step to solve it using a model based approach The aim is not just to explain machine learning methods but also showcase how to create debug and

evolve them to solve a problem

Features

- Explores the assumptions being made by machine learning systems and the effect these assumptions have when the system is applied to concrete problems
- Explains machine learning concepts as they arise in real world case studies
- Shows how to diagnose understand and address problems with machine learning systems
- Full source code available allowing models and results to be reproduced and explored
- Includes optional deep dive sections with more mathematical details on inference algorithms for the interested reader
