Children and Work Bernard Goldstein, 2020-02-26 What do children know about work careers and related topics What is the pattern of growth in values attitudes beliefs and knowledge Using quantitative and anecdotal evidence gathered from interviewing over 900 grade school students in five New Jersey communities the authors analyze childhood socialization to the concept of work Existing literature on this topic focuses on the critical years of occupational choice But Goldstein and Oldham strongly suggest that much of the child's work related development has already occurred prior to entry into secondary school and that career education must receive increased emphasis during the elementary years Their evidence corroborates the pattern of rapid progress toward childhood awareness of important social phenomena such as war politics race gender roles and economics By the seventh grade children have an awareness in these areas that approximates that of adults Traditional stereotypes concerning appropriate work roles for women continue to exist at the elementary school level This work is a comprehensive empirical treatment of childhood socialization to work fitting neatly into the growing body of literature on the socialization of the child into various political economic and social roles *Children and Work* is in the sociological tradition but the findings are presented in the context of a growing body of social science research on early socialization

Confronting Racism in Higher Education Jeffrey S. Brooks,Noelle Witherspoon-Arnold,2013-03-01 Racism and ignorance churn on college campuses as surely as they do in society at large Over the past fifteen years there have been many discussions regarding racism and higher education Some of these focus on formal policies and dynamics such as Affirmative Action or The Dream Act while many more discussions are happening in classrooms dorm rooms and in campus communities Of course corollary to these conversations some of which are generative and some of which are degenerative is a deafening silence around how individuals and institutions can actually understand engage and change issues related to racism in higher education This lack of dialogue and action speaks volumes about individuals and organizations and suggests a complicit acceptance tolerance or even support for institutional and individual racism There is much work to be done if we are to improve the situation around race and race relation in institutions of higher education There is still much work to be done in unpacking and addressing the educational realities of those who are economically socially and politically underserved

and oppressed by implicit and overt racism These realities manifest in ways such as lack of access to and within higher education in equitable outcomes and in a disparity of the quality of education as a student matriculates through the system While there are occasional diversity and inclusion efforts made in higher education institutions still largely address them as quotas and not as paradigmatic changes This focus on counting toward equity rather than creating a culture of equity is basically a form of white privilege that allows administrators and policymakers to show incremental progress and avoid more substantive action toward real equity that changes the culture s of institutions with longstanding racial histories that marginalize some and privilege others Issues in higher education are still raced from white perspectives and suffer from a view that race and racism occur in a vacuum Some literature suggests that racism begins very early in the student experience and continues all the way to college Berlak Moyenda This mis education mislabeling and mistreatment based on race often develops as early as five to ten years old and follows them to postgraduate education and beyond [Resources in Education](#) ,1987-10 [The Publishers Weekly](#) ,1916 **Market as a Weapon** Anton Oleinik,2017-09-08 Power is all encompassing in Russia and mediates most interactions among people including everyday decisions Even the recent administrative reforms in the country which began at the end of the 1990s have tried to reshape the government institutions and modernize the country through the use of power Changes were initiated and implemented by people vested with power Power convention and trust can all support coordination However in the Russian institutional context power tends not only to supplement the alternative coordination mechanisms but also to substitute them Power can be used to solve problems related to social action by merging two or several centers of decision making into one The actor vested with power decides exactly how coordination and adjustment can be achieved This path breaking volume shows how power turns into a unique coordination mechanism and what are consequences of such transformation for everyday life and businesses **Market as a Weapon** focuses on issues of power and domination using the configuration of power relationships in Russia as a critical case but goes far beyond a narrowly defined scope of country specific studies Particular emphasis is put on domination by virtue of a constellation interests in the market since this is a relatively underexplored yet broadly used technique for imposing will in all countries that heavily rely on interventionist policies Instead of being a liberating force the market becomes an additional instrument facilitating the continuous reproduction of power which explains the title of the book Both qualitative and quantitative data including more than one hundred in depth interviews with experts state servants and businesspeople in Russia as well as statistics are used throughout the text of this major book *Translating Cultures* David Katan,Mustapha Taibi,2021-06-17 This bestselling coursebook introduces current understanding about culture and provides a model for teaching culture to translators interpreters and other mediators The approach is interdisciplinary with theory from Translation Studies and beyond while authentic texts and translations illustrate intercultural issues and strategies adopted to overcome them This new third edition has been thoroughly revised to update scholarship and examples and now includes

new languages such as Arabic Chinese German Japanese Russian and Spanish and examples from interpreting settings This edition revisits the chapters based on recent developments in scholarship in intercultural communication cultural mediation translation and interpreting It aims to achieve a more balanced representation of written and spoken communication by giving more attention to interpreting than the previous editions especially in interactional settings Enriched with discussion of key recent scholarly contributions each practical example has been revisited and or updated Complemented with online resources which may be used by both teachers and students this is the ideal resource for all students of translation and interpreting as well as any reader interested in communication across cultural divides Additional resources are available on the Routledge Translation Studies Portal <http://routledgetranslationstudiesportal.com>
