Guide publication describes the IBM FlashSystem 5200 solution which is a next generation IBM FlashSystem control enclosure. It is an NVMe end to end platform that is targeted at the entry and midrange market and delivers the full capabilities of IBM FlashCore technology. It also provides a rich set of software defined storage SDS features that are delivered by IBM Spectrum Virtualize including the following features: Data reduction and deduplication, Dynamic tiering, Thin provisioning, Snapshots, Cloning, Replication, Data copy services, Transparent Cloud Tiering, IBM HyperSwap including 3 site replication for high availability, HA, Scale out and scale up configurations further enhance capacity and throughput for better availability. The IBM FlashSystem 5200 is a high performance storage solution that is based on a revolutionary 1U form factor. It consists of 12 NVMe Flash Devices in a 1U storage enclosure drawer with full redundant canister components and no single point of failure. It is designed for businesses of all sizes including small remote branch offices and regional clients. It is a smarter self optimizing solution that requires less management which enables organizations to overcome their storage challenges. Flash has come of age and price point reductions mean that lower parts of the storage market are seeing the value of moving over to flash and NVMe based solutions. The IBM FlashSystem 5200 advances this transition by providing incredibly dense tiers of flash in a more affordable package. With the benefit of IBM FlashCore Module compression and new QLC flash based technology becoming available, a compelling argument exists to move away from Nearline SAS storage and on to NVMe. With the release of IBM FlashSystem 5200 Software V8.4, extra functions and features are available including support for new Distributed RAID1, DRAID1, features, GUI enhancements, Redirect on write for Data Reduction, Pool, DRP snapshots and 3 site replication capabilities. This book is aimed at pre sales and post sales technical support and marketing and storage administrators.
