Social Vulnerability to Disasters, Second Edition Deborah S.K. Thomas, Brenda D. Phillips, William E. Lovekamp, Alice Fothergill, 2013-05-09 The 2010 Haiti and Chili earthquakes the 2010 BP oil spill in the Gulf of Mexico and the 2011 Fukushima earthquake and tsunami in Japan are but a few examples of recent catastrophic events that continue to reveal how social structure and roles produce extensive human suffering and differential impacts on individuals and communities These events bring social vulnerability to the forefront in considering how disasters unfold clearly revealing that disasters are not created from the physical event alone Equally important people even those considered vulnerable respond in innovative and resilient ways that unveil the strength of human ingenuity and spirit It is not a foregone conclusion that a hazard event even a large one will result in catastrophic loss This updated second edition of Social Vulnerability to Disasters focuses on the social construction of disasters demonstrating how the characteristics of an
