Esther Stocker Doubts About The Line:

Mathematics in the Visual Arts Ruth Scheps, Marie-Christine Maurel, 2021-02-17 Art and science are not separate universes This book explores this claim by showing how mathematics geometry and numerical approaches contribute to the construction of works of art This applies not only to modern visual artists but also to important artists of the past To illustrate this this book studies Leonardo da Vinci who was both an engineer and a painter and whose paintings can be perfectly modeled using simple geometric curves The world gains intelligibility through elegant mathematical frameworks from the projective spaces of painting to the most complex phase spaces of theoretical physics A living example of this interdisciplinarity would be the sculptures of Jean Letourneur a specialist in both chaos sciences and carving as evidenced in his stonework This book also exemplifies the geometry and life of forms through contemporary works of art including fractal art which have never before been represented in this type of work

Fields of View A.L. Rees, 2020-10-29 Drawing on film theory literary modernism psychology and art history *Fields of View* elucidates an expanded network of connections between avant garde film and wider culture In this bold and original work A L Rees identifies three key terms field frame and interval and charts their use by filmmakers and theorists such as Dziga Vertov Sergei Eisenstein Bruce Baillie Maya Deren Malcolm Le Grice and Werner Nekes from the 1920s through to the present day A seminal voice in film culture Rees left the incomplete manuscript for this book on his death and Simon Payne has subsequently carefully prepared the book for publication *Fields of View* is an important work that establishes a unique perspective on experimental film
