Exam Agricultural Sciences P2014 November:

Agricultural Policy in the United States James L. Novak, Larry D. Sanders, James W. Pease, 2015-02-20 *Agricultural Policy in the US* Evolution and Economics traces the foundation of US agricultural policy from its colonial roots to the present using economic concepts to analyze and interpret political and economic consequences Ancient Roman food and agricultural reform English Corn Law and other historic examples of agricultural policies are included to show that agricultural policy has a long history and has been found necessary for governance throughout history Processes employed to develop US agricultural policies the structure and function of government that develops and implements agricultural policy and the specific evolution of policy from the early twentieth century to the Agricultural Act of 2014 are included Specific policies in past farm bills are detailed in order to track their evolution and economic effects This textbook includes arguments for and against common tools of US agricultural policy This debate continues today and can be seen in a gradual change over time from taxes and tariffs to risk management Information presented does not attempt to influence the readership towards a pro or con position but rather to present information to help the readers to understand the issues related to agricultural policy in the US

Genetic and Agro-Morphological Diversity and Genotype by Environment Interaction of Yield and Nutritional Quality Traits in Pearl Millet Germplasm from Sudan Elfadil M A Bashir, 2015-06-22 Due to its adaptation to extremely harsh environments pearl millet *Pennisetum glaucum* L R Br is one of the most important staple cereals cultivated in the arid and semi arid tropics of Asia and Africa In these regions pearl millet is mainly produced under low input rainfed conditions in traditional farming systems where several constraints are affecting pearl millet production such as inter annual rainfall variability pests diseases Striga and use of low yielding varieties The majority of the human population in these regions is affected by nutritional deficiencies of essential minerals causing micronutrient malnutrition so called hidden hunger Plant genetic resources provide basic materials for selection and improvement of crop productivity through the optimal design of breeding programs to meet food security needs of the world's rapidly rising population The advent of PCR based molecular markers such as simple sequence repeats SSRs has created an opportunity for fine scale genetic characterization of germplasm collections Understanding the structure of diversity and the identification of distinct materials with complementary traits for recombination by crossing provides the foundation for effective and sustained pearl millet population breeding and synthetic and hybrid development based on the concept of heterotic groups in this allogamous crop

Governing Agricultural Sustainability Phil Macnaghten, Susana Carro-Ripalda, 2015-06-26 Although GM crops are seen by their advocates as a key component of the future of world agriculture and as part of the solution for world poverty and hunger their uptake has not been smooth nor universal they have been marred by controversy and all too commonly their regulation has been challenged as inadequate even biased This book aims to understand these dynamics examining the impacts of GM crops in diverse contexts and their potentials to contribute to sustainable agricultural futures Part 1 draws on

research from three global rising powers Brazil India and Mexico exploring the views of scientists farmers and publics Using a diverse array of ethnographic and qualitative methodologies the book examines the dynamics that have underpinned the controversy in three diverse geo political contexts the manner in which dominant institutional framings have been closely aligned with the interests of powerful elites and the multiple ways in which these have been resisted through local symbolic and material practices Part 2 comprises a series of short comment pieces from 11 leading social and natural scientists responding to the question of how to develop a policy framework for the responsible innovation of sustainable culturally appropriate and socially just agricultural GM technologies This innovative book offers new insights for researchers and postgraduates in Science and technology studies Agro ecology and Environmental Studies Development studies Anthropology Human Geography Sociology Political Science Public Administration Latin American studies and Asian studies 10
