How can markets help us adapt to the challenges of climate change Editor Terry L. Anderson brings together this collection of essays featuring the work of nine leading policy analysts who argue that market forces are just as important as government regulation in shaping climate policy and should be at the heart of our response to helping societies adapt to climate change Anderson notes in his introduction that most current climate policies such as the Paris Agreement require hard to enforce collective action and focus on reducing or mitigating greenhouse gases rather than adapting to their negative effects Adaptive actions can typically deliver much more faster and more cheaply than any realistic climate policy The authors tackle a range of issues the hidden costs of renewable energy sources the political obstacles surrounding climate change policy insurance and financial instruments for pricing risk of exposure to the effects of climate change and more Reliance on emerging renewable energies and a carbon tax are not enough to prevent the effects of global warming they argue We must encourage more private action and market incentives to adapt to a rapidly changing climate **The Pragmatist** Joseph P. Viteritti, 2017-08-03

When Michael Bloomberg handed over the city to Bill de Blasio New York and the country were experiencing record levels of income inequality De Blasio was the first progressive elected to City Hall in twenty years Invoking Fiorello La Guardia's name he pledged to improve the lives of those marginalized by poverty and prejudice Unlike La Guardia de Blasio did not have allies in Washington like President Franklin D. Roosevelt who could effectively support his progressive agenda As de Blasio approached the end of his first term the situation worsened with Donald Trump in the White House and a Republican controlled Congress determined to further reduce social programs that help the needy As a result de Blasio's mayoralty is an illuminating case study of what mayors can and cannot do on their own to address economic and social inequality As the Democratic Party attempts to reassemble a viable political coalition that cuts across boundaries of race class and gender de Blasio's efforts to redefine priorities in America's largest city is instructive Joseph P. Viteritti's *The*

Pragmatist is the first in depth look at de Blasio both the man himself and his policies in crucial areas such as housing homelessness education and criminal justice It is a test case for the viability of progressivism itself Along the way Viteritti introduces the reader to every NYC mayor since La Guardia He covers progressives who breathed life into the soul of the city before the devastating fiscal crisis of 1975 put it on the brink of bankruptcy and those post fiscal crisis chief executives who served during times of limiting austerity This engaging story of the rise fall and rebirth of progressivism in America s major urban center demonstrates that the road to progress has been a long and continuing journey

Higher Expectations Derek Bok, 2022-05-17 How our colleges and universities can respond to the changing hopes and needs of society In recent decades cognitive psychologists have cast new light on human development and given colleges new possibilities for helping students acquire skills and qualities that will enhance their lives and increase their contributions to society In this landmark book Derek Bok explores how colleges can reap the benefits of these discoveries and create a more robust undergraduate curriculum for the twenty first century Prior to this century most psychologists thought that creativity empathy resilience conscientiousness and most personality traits were largely fixed by early childhood What researchers have now discovered is that virtually all of these qualities continue to change through early adulthood and often well beyond Such findings suggest that educators may be able to do much more than was previously thought possible to teach students to develop these important characteristics and thereby enable them to flourish in later life How prepared are educators to cultivate these qualities of mind and behavior What do they need to learn to capitalize on the possibilities Will college faculties embrace these opportunities and make the necessary changes in their curricula and teaching methods What can be done to hasten the process of innovation and application In providing answers to these questions Bok identifies the hurdles to institutional change proposes sensible reforms and demonstrates how our colleges can help students lead more successful productive and meaningful lives
