Information, Computer and Application Engineering Hsiang-Chuan Liu, Wen-Pei Sung, Wenli Yao, 2018-06-12 This proceedings volume brings together peer reviewed papers presented at the International Conference on Information Technology and Computer Application Engineering held 10-11 December 2014 in Hong Kong China. Specific topics under consideration include Computational Intelligence, Computer Science and its Applications, Intelligent Information Processing and Knowledge Engineering, Intelligent Networks and Instruments, Multimedia, Signal Processing and Analysis, Intelligent Computer Aided Design Systems and other related topics. This book provides readers a state of the art survey of recent innovations and research worldwide in Information Technology and Computer Application Engineering, in so doing furthering the development and growth of these research fields, strengthening international academic cooperation and communication and promoting the fruitful exchange of research ideas. This volume will be of interest to professionals and academics alike, serving as a broad overview of the latest advances in the dynamic field of Information Technology and Computer Application Engineering. *Current And Advanced Researches In Science And Math Education I* Tayfun Tutak, 2024-05-03

Improving Primary Mathematics Education, Teaching and Learning Mellony Graven, Hamsa Venkat, 2017-01-19 This book focuses on how to improve the teaching and learning of primary level mathematics education within resource constrained contexts. It builds on two large numeracy projects within South Africa which speak to broader global concerns and highlight how research and development not only enables one to meet ethical imperatives but also explore how further interventions can be developed. Teacher and research communities must work together to create mutually beneficial relationships and establish a cohesive understanding of the requirements of primary mathematics education. **Handbook of Reading Assessment** Sherry Mee Bell, R. Steve McCallum, 2015-07-30 The Handbook of Reading Assessment, Second Edition, covers the wide range of reading assessments educators must be able to use and understand to effectively assess and instruct their students. Comprehensive and filled with numerous authentic examples, the text addresses informal classroom based assessment, progress monitoring, individual norm referenced assessment and group norm referenced or high stakes testing. Coverage includes assessment content relevant for English language learners and adults. A set of test guidelines to use when selecting or evaluating an assessment tool is provided. New and updated in the Second Edition: Impact on reading assessment of Common Core Standards for literacy; increased top down focus on accountability and high stakes tests; innovations in computerized assessment of reading; Latest developments in Response to Intervention (RTI) model particularly as they impact reading assessment; International Reading Association standards for reading educators and brief discussion of International Dyslexia Association standards; Types of reading assessment including discussion of formative versus summative assessment; Expanded coverage of assessment of reading motivation; Expanded coverage of writing assessment; New and revised assessments across genres of reading assessment; Companion Website: numerous resources relevant to

Handbook of Educational Psychology Lyn Corno, Eric M. Anderman, 2015-07-06 The third edition of the Handbook of Educational Psychology is sponsored by Division 15 of the American Psychological Association. In this volume, thirty chapters address new developments in theory and research methods while honoring the legacy of the field's past. A diverse group of recognized scholars within and outside the U.S. provide integrative reviews and critical syntheses of developments in the substantive areas of psychological inquiry in education: functional processes for learning, learner readiness and development, building knowledge and subject matter expertise, and the learning and task environment. New chapters in this edition cover topics such as learning sciences research, latent variable models, data analytics, neuropsychology, relations between emotion, motivation, and volition, EMOVO, scientific literacy, sociocultural perspectives on learning, dialogic instruction, and networked learning. Expanded treatment has been given to relevant individual differences, underlying processes, and new research on subject matter acquisition. The Handbook of Educational Psychology, Third Edition, provides an indispensable reference volume for scholars in education and the learning sciences, broadly conceived, as well as for teacher educators, practicing teachers, policy makers, and the academic libraries serving these audiences. It is also appropriate for graduate-level courses in educational psychology, human learning and motivation, the learning sciences, and psychological research methods in education and psychology.

Psychology and Mathematics Education Gila Hanna, Laura Macchi, Karin Binder, Laura Martignon, Katharina Loibl, 2023-09-05 Modern Mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems. Thus, it is par excellence a model of rational inquiry. Links between Cognitive Psychology and Mathematics Education have been particularly strong during the last decades. Indeed, the Enlightenment view of the rational human mind that reasons, makes decisions, and solves problems based on logic and probabilities was shaken during the second half of the twentieth century. Cognitive psychologists discovered that humans' thoughts and actions often deviate from rules imposed by strict normative theories of inference. Yet these deviations should not be called errors, as Cognitive Psychologists have demonstrated: these deviations may be either valid heuristics that succeed in the environments in which humans have evolved, or biases that are caused by a lack of adaptation to abstract information formats. Humans, as the cognitive psychologist and economist Herbert Simon claimed, do not usually optimize but rather satisfice, even when solving problems. This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education. We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program. In Simon's bounded rationality, and its direct descendant, ecological rationality, rationality is understood in terms of cognitive success in the world: correspondence rather than in terms of conformity to content-free norms of coherence, e.g., transitivity.

Towards a holistic approach to support learners at risk of interrupted development Macalane J. Malindi, Johnnie Hay, Thabo Makhalemele, 2024-02-23 The COVID-19 pandemic and the restrictions

that came with it led to unprecedented disruptions in learner development and put them at risk of poor developmental outcomes. It is thus important that the extent of the disruption on their development and the support needs of learners be investigated. Researching the impact of the disruption should focus on holistic development. In this book the authors use multiple research approaches and methods of gathering data in their respective fields to examine the impact of the disruption and determine the support needs of learners. Data gathered through the different methods are processed and findings are presented. The findings have implications for both practice and future research in the fields of inclusive education, learner support, educational psychology, movement education, Life Orientation, and curriculum development.

Math Plus Reading Workbook, 2014-02-03 Summer Link Math Plus Reading is designed to be a fun way to help a child prepare for the grade ahead during the summer. Each 320 page book includes fun learning activities covering a range of topics in math and reading. The activities review skills from the previous grade and gradually increase in difficulty to prepare a child for the grade ahead. Summer Link Math Plus Reading is designed for parents looking for a fun and affordable way to help their children stop the summer learning slide and prepare for the grade ahead during the 10 weeks of summer. The easy to use full color activities review and extend essential skills and increase confidence at school. A Test Practice section at the end of each book provides tips and practice for standardized tests and will allow the child to review the topics covered. A skills checklist for parents, a recommended summer reading list, and an answer key are also included. Effective Grading Practices for Secondary Teachers Dave Nagel, 2015-03-04 Enact innovative grading systems that more accurately describe student progress. This book challenges traditional grading practices and provides alternatives that can have direct impact on student success. By making subtle shifts toward standards based grading systems, schools can reduce unnecessary course failures, provide students and their families a more accurate picture of current progress, and increase opportunities for success. The author offers a range of grading reform strategies that are built from practical frameworks that are effective and simple to adapt. Among the many strengths of this book are: Practical application of existing research and evidence base for effective secondary grading reforms; A framework for schools and districts to apply and adapt failure prevention strategies such as early failure detection, Amnesty Days, and meaningful stipulated second chance opportunities for students to reach mastery; Functional strategies and actions for shifting toward standards based referenced grading without entirely abandoning letter grades; Countering resistance to change through a clearly articulated plan for conducting school wide and classroom level action research around the effectiveness of new or adjusted grading practices; Informative and pragmatic; This book is spot on with analysis of this elephant in the room issue. Nagel uses both empathy and humor in getting to the heart of a process to generate real solutions while underscoring the ultimate need for teacher voice in any successful implementation. He provides ready made strategies for real impactful change. I'm left hopeful that feedback will rule the day. Bruce Potter, Superintendent Berkshire UFSD. Nagel offers an insightful and articulate voice to secondary improvement and alignment.

The School Reform Landscape Reloaded Christopher H. Tienken, 2020-10-30 The School Reform Landscape Reloaded More Fear Myths and Lies peels back the curtain of school reform to examine the tensions that exist between the democratic and equitable system of public education and the emerging dual system based on elite interests aimed at profit making and decreasing education equity The author takes in depth and controversial look at school reform since the launch of Sputnik I Education reform events proposals and policies are examined through the lens of progressivist philosophy and critical social theory Some of the issues and policies critiqued include the neoliberal corporate influence on education the Sputnik myth A Nation At Risk standardization charter schools and other relevant topics The author provides an evidence based view of the free market reform ideas and he pierces the veil of the new reform policies to find that they are not built upon empirical evidence but instead rest solidly on foundations of myth fear and lies Ideas for a new set of reform policies based on empirical evidence
