international contributions from Aotearoa New Zealand Australia England Malaysia Peru Philippines Portugal Morocco Jordan and the U S this volume is particularly important to researchers and scholars in the fields of youth studies education and social work

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Facing Forward Sajitha Bashir, Marlaine Lockheed, Elizabeth Ninan, Jee-Peng Tan, 2018-09-20 Facing Forward lays out a range of policy and implementation actions that are needed for countries in Sub Saharan Africa to meet the challenge of improving learning while expanding access and completion of basic education for all The book underscores the importance of aligning the education system to be relentlessly focused on learning outcomes and to ensuring that all children have access to good schools good learning materials and good teachers It is unique in characterizing countries according to the challenges they faced in the 1990s and the educational progress they have made over the past 25 years allowing countries in the region to learn from each other The authors review

the global literature and add to it by their extensive new analyses of multiple datasets from more than three dozen countries in the region they integrate findings about what affects children's learning their access to schooling and progress through basic education The book draws lessons from the region and for the region about what works and what is needed to better implement what is known to have worked The book examines four areas to help countries better align their systems to improve learning 1 completing the unfinished agenda of reaching universal basic education with quality 2 ensuring effective management and support of teachers 3 targeting spending priorities and budget processes on improving quality and 4 closing the institutional capacity gap It concludes with an assessment of how future educational progress may be affected by projected fertility rates and economic growth

The Economics of Equity in K-12 Education Goldy Brown III, Christos A. Makridis, 2023-02-07 Despite decades of increased state and federal funding for education student outcomes have largely deteriorated according to the 2022 NAEP exam results reading and math capabilities hit a thirty year low The emerging workforce is less prepared to handle the increasingly complex demands of the future which is likely to accelerate income inequality and stifle our nation's economic and social competitiveness Presenting the latest research on the economics of K 12 education this book makes recommendations about specific educational programming that have shown potential in increasing student outcomes for all learners focusing on human capital and practical recommendations for state and local policy makers and educational leaders

Emerging Issues in Sustainable Development Mitsuo Matsushita, Thomas J. Schoenbaum, 2016-10-05 This book seeks to answer the questions how do the rules of international treaties on trade and investment apply to the new laws and policies relating to energy related trade and do the rules of the multilateral system contribute to or detract from sustainable development An emerging set of new problems in the law of international trade is how to reconcile the rules of the multilateral trading system with shortages of certain natural resources and the necessity to develop renewable energy resources The chapters in this book provide a comprehensive analysis of the international trade issues presented by national trade laws and policies with regard to natural resources and energy This book is about the extent to which we are interpreting existing rules to cover emerging problems and how the rules of the multilateral trading system can be adapted to achieve sustainable development in natural resources and energy The book begins with a survey of selected national laws relating to recent restrictions on the export of natural resources both resources used to produce energy as well as natural resources essential for industrial production After examining the range of such laws in selected important countries we turn to the application of the rules of the multilateral trading system to such export restrictions We discuss the major rules of the World Trade Organization WTO as well as the natural resources rules in selected regional preferential free trade agreements While there is not a comprehensive global legal regime on competition law we believe it is also important to examine how selected national competition laws impact

export restrictions on natural resources This book will be a major contribution to the international dialogue on international economic law issues with respect to trade in natural resources and energy
