Expectations and Aspirations Safaa El Tayeb El-Kogali, Caroline Krafft, 2019-01-30 Education which has been at the heart of the Middle East and North Africa MENA region s history and civilizations for centuries has a large untapped potential to contribute to human capital well being and wealth The region has invested heavily in education for decades but it has not been able to reap the benefits of its investments Despite a series of reforms

MENA has remained stuck in a low learning low skills level Expectations and Aspirations A New Framework for Education in the Middle East and North Africa identifies four key sets of tensions that are holding back education in the region credentials and skills discipline and inquiry control and autonomy and tradition and modernity These tensions are shaped by society and are reflected in classrooms If they are not addressed MENA will continue to operate at a level below its potential This report outlines a new framework with a three pronged approach that can help address these tensions and unleash the potential of education in MENA A concerted push for learning that starts early for all children regardless of background with qualified and motivated educators and that leverages technology uses modern approaches and monitors learning outcomes A stronger pull for skills by all stakeholders in the labor market and society that involves coordinated multisystem reforms within and beyond the education system A new pact for education at the national level with a unified vision shared responsibilities and accountabilities Education is not just the responsibility of the education system it is everyone s business The push pull and pact framework offers an opportunity for MENA to move forward to reclaim its heritage of a learned region and to meet the expectations and aspirations of its people The current situation in MENA requires a renewed focus on education not just as a national priority for economic growth and social development but as a national emergency for stability peace and prosperity

*On My Own* Xueli Wang, 2021-02-18 2020 ASHE Council for the Advancement of Higher Education Programs CAHEP Barbara Townsend Lecture Award 2021 Transfer Champion Catalyst Award from the National Institute for the Study of Transfer Students NISTS 2021 Outstanding Publication Award AERA Division J Publication and Research On My Own The Challenge and Promise of Building Equitable STEM Transfer Pathways is the first book of its kind to provide a

detailed on the ground examination of the difficult paths curricular interpersonal and institutional that students must chart through community college The book follows 1 670 two year college students over four years as they begin STEM programs in the Midwest and documents their educational and life experiences as they moved toward or away from the prospect of transfer to a four year institution Their stories reveal that they were on their own left to navigate the pathways to transfer without meaningful institutional support The students pursued one of four pathways or momentum trajectories linear upward detoured deferred or taking a break The preexisting and lasting disparities in their access to education and financial resources their experiences with teaching and advising and the conundrum between support from and for family among others propelled them onto different trajectories in their quest for transfer As this book makes painfully clear the current state of transfer acts as a mechanism that perpetuates and worsens inequities in educational outcomes As Xueli Wang argues to cultivate an equitable STEM transfer pathway culturally relevant and responsive supports that are accessible welcoming and validating must be put in place at the institutional level and appeal to the talent motivation and unique needs of historically marginalized students In doing so postsecondary institutions will be better positioned to fulfill their promise as an equitable pathway to bachelor's degrees and beyond

***The Wiley Handbook of Early Childhood Development Programs, Practices, and Policies*** Elizabeth Votruba-Drzal, Eric Dearing, 2017-01-30 The first and only comprehensive review of current early childhood development theory practices policies and the science behind them This unique and important book provides a comprehensive overview of the current theory practices and policies in early childhood

development within the contexts of family, school, and community and society at large. Moreover, it synthesizes scientifically rigorous research from an array of disciplines in an effort to identify the most effective strategies for promoting early childhood development. Research into childhood development is booming, and the scientific knowledge base concerning early childhood development is now greater than that of any other stage of the human life span. At the same time, efforts to apply that knowledge to early childhood practices, programs, and policies have never been greater or more urgent. Yet surprisingly, until *The Handbook of Early Childhood Development: Programs, Practices, and Policies*, there was no comprehensive critical review of the applied science in the field. The book begins with in-depth coverage of child and family approaches. From there, it moves onto a consideration of school and community-based strategies. It concludes with a discussion of current social policies on health and development in early childhood and their implications. Provides a comprehensive overview of the state of the knowledge base along with guidance for the future of the field. Examines the underlying theory and basic science guiding efforts to promote early childhood development. Critically reviews the strength of the empirical support for individual practices, programs, and policies. Explores key opportunities and barriers policymakers and practitioners face when implementing various approaches. Pays particular attention to socioeconomically disadvantaged and other disenfranchised populations. *The Handbook of Early Childhood Development: Programs, Practices, and Policies* is a valuable resource for practitioners, scholars, graduate students, and advanced undergraduate students across the social sciences who are interested in strengthening their understanding of current strategies for promoting early childhood development and the science informing those strategies. *Parental Engagement and Out-of-School Mathematics Learning* Tim Jay, Jo Rose, 2023-08-07. Challenging preconceived ideas and supporting children to acquire mathematical understandings. *Parental Engagement and Out of School Mathematics Learning* informs innovative and vital educational policy and practice. *Sense-Making and Shared Meaning in Language and Literacy Education* Sharon Murphy, 2020-07-15. This textbook provides a framework for teaching children's language and literacy and introduces research-based tactics for teachers to use in designing their literacy programs for children. Exploring how sense making occurs in contemporary literacy practice, Murphy comprehensively covers major topics in literacy, including contemporary multimodal literacy practices, classroom discourse, literacy assessment, language and culture, and teacher knowledge. Organized around themes: talk, reading, and composing; representation, this book comprehensively invites educators to make sense of their own teaching practices while demonstrating the complexities of how children make sense of and represent meaning in today's world. Grounded in research, this text features a wealth of real-world multimodal examples, effective strategies, and teaching tactics to apply to any classroom context. Ideal for literacy courses, preservice teachers, teacher educators, and literacy scholars, this book illustrates how children become literate in contemporary society and how teachers can create the conditions for children to broaden and deepen their sense making and expressive efforts.
