How To Make Consistent Profits In The Stock Market:

How to make Consistent Profits in the Stock Market G. Scuti, As a brand new investor and trader with zero knowledge of the business you are at a loss as to what information you actually do and do not need and you tend to make the same mistakes as everyone else trying to do this business Newbie stock traders tend to do what everyone else is doing and study what everyone else is studying thus they have the same results and failures as everyone else don't be that trader The market is not a big secret and all of the information you need to make a trading decision is right out in the open If you know where to find the information and know what to look for you can and will make some money every day in the market provided you are looking at the right information and utilizing the best trading techniques How to make Consistent Profits in the Stock Market can help you keep it simple and filter the huge amount of information out there down to only what you need to know right away and then can work towards adding more information and studies as you go My philosophy is to start small and build on success have limited exposure while you hone your skills then progress as you become more competent and build up your account All traders who have made it and make money consistently in the market are making it from the beginner traders who have visions of grandeur and dollar signs rolling around in their eyes like some old cartoon If you want to make it in this business I would listen to the advice in How to make Consistent Profits in the Stock Market very carefully I am going to share with you information that professional real money traders don't want you to know about **How to Make**

Consistent Profits in the Stock Market Ricardo Calca, 2014-11-11 Everyone is a great trader in hindsight One of the greatest benefits of this book is that I am telling you all of the things not to do to begin with all in one place all at one time It is clear it is concise Should you desire to not listen to the advice I give you in this short book then what ever happens happens The thought provoking ideas and advice in this book can save you a lot of learning curve time and also hopefully save you some of your hard earned money on lost positions if you just take the time to think what is being presented to you logically The information in here is brutally honest and practical with pure and transparent content Stock trading offers huge profit potential for traders if you have the right tools for success from the very start on day one You need to find an edge and a way of trading that matches your personality and psychology and then then go in the market and get paid What you can learn from this book takes most traders years to uncover themselves You can know this information for the cost of this book that as I said can save you quite a large amount of learning curve time and perhaps a lot of money You're welcome There is no system in this book This book contains the information you as a beginning trader must have to become successful and consistently profitable on a daily basis I don't know about you but I am in this business to make money Anyone who tells you anything else is full of BS It is a risk taking money making business If you are not prepared for that then stop reading now Trading is easy however most brand new traders make it so complicated for themselves that they end up quitting before they have had a chance to make any real money Don't be that trader Don't become one of the sheeple of the herd and study what

everyone else studies do what everyone else does and make the same mistakes everyone else does Don't get me wrong you will make some mistakes and perhaps lose some money however if you have done all of the right preparation and studied the right information from the very beginning your mistakes will be minimal and not repeated over and over and over because you'll know better from having read this entire book I am not saying it is going to happen overnight Most successful traders and investors I associate with have in the very high thousands of hours of screen time and have their own rules based plan for the type of specific trading and investing they do They are only looking for the lowest risk highest reward positions with the highest probability of having a positive outcome If you are looking for anything else or doing it any other way chances are your outcome from the market could be financially unfavorable
