The second talk was delivered by He Jifeng from the International Institute for Software Technology, IIST, Macau. Prof. Iyengar's talk on "The Distributed Sensor Networks: An Emerging Technology" was focused on new ideas about the use of distributed systems for emerging technology, while Prof. Jifeng's talk on "Linking Theories of Concurrency by Retraction" dealt with semantics of concurrency. The Pearson Guide to Logical Reasoning and Data Interpretation for the CAT 2/e Sinha, **Networking and Mobile Computing** Xicheng Lu, Wei Zhao, 2005-09-06. Welcome to Zhangjiajie for the 3rd International Conference on Computer Network and Mobile Computing, ICCNMC 2005. We are currently witnessing a proliferation in mobile wireless technologies and applications. However, these new technologies have ushered in unprecedented challenges for the research community across the range of networking, mobile computing, network security, and wireless web applications and optical network topics. ICCNMC 2005 was sponsored by the China Computer Federation in cooperation with the Institute for Electrical and Electronics Engineers, IEEE Computer Society. The objective of this conference was to address and capture highly innovative and state-of-the-art research and work in the networks and mobile computing industries. ICCNMC 2005 allowed sharing of the underlying theories and applications and the establishment of new and long-term collaborative channels aimed at developing innovative concepts and solutions geared to future markets. The highly positive response to ICCNMC 2001 and ICCNMC 2003, held in Beijing and Shanghai respectively, encouraged us to continue this international event. In its third year, ICCNMC 2005 continued to provide a forum for researchers, professionals, and industrial practitioners from around the world to report on new advances in computer network and mobile computing, as well as to identify issues and directions for research and development in the new era of evolving technologies.
