Journal Of Light Construction S:

The Electrical Journal ,1908 **Light verbs** Anna Riccio,Jens Fleischhauer,2025-04-21 Light verbs are semantically reduced verbs that simultaneously exhibit a heavy verb usage The papers collected in this volume examine light verbs from different perspectives in various languages including several Romance and Germanic languages such as Italian Spanish Catalan German and English as well as Mandarin Chinese and Japanese The questions addressed in this volume include What meaning does a light verb contribute to a light verb construction What restrictions regarding nominal elements do light verbs exhibit What influence do light verbs have on the argument structure of light verb constructions The analyses draw on different frameworks including Generative Syntax and Construction Grammar and combine corpus linguistic investigations with theoretical modeling **Light Verb Constructions as Complex Verbs** Anna Pompei,Lunella Mereu,Valentina Piunno,2023-10-24 The notion of light verb constructions has been traditionally related to the insignificance of the verb which is described as a grammatical item only codifying TAM system and features whereas the whole predicative content is thought to be conveyed by the noun This book deals with the light verb constructions as instances of complex verbs intended as multi predication but monoclausal structures This allows to deepen the actual verb lightness the effective noun predicativity as well as their effect on the cohesion of the construction The papers in this volume reflect on the concrete contribution of noun and verb to the event and argument structure and on the relevance of semantically different noun classes for the verb selection From different theoretical approaches data of a great variety of languages are investigated such as Indo European languages both modern Germanic Slavic Romance and Iranian languages and ancient Latin and Ancient Greek but also Mandarin Chinese and different polysynthetic languages e g Ket Nivkh Murrinh Patha Kiowa Bininj Gun wok Ainu The range of topics languages and perspectives presented in this book make it of great interest to both theoretical and applied linguists *Hybridity in Translated Chinese* Guangrong Dai,2016-05-20 This book investigates the characteristics of hybridity in Chinese texts that have been translated from English It also explores the potential impact of translation and hybridity on written Chinese over the past 70 years It suggests that English Chinese translations have introduced more and more hybrid structures into Chinese This book can help us with understanding language change and development and it can also shed new light on the translation process and help identify translation norms Journal of the Senate of the United States of America United States. Congress. Senate,1911 **Municipal Journal and Engineer** ,1910 *American Gas-light Journal and Chemical Repertory* ,1905 **With Light Verb Constructions from Syntax to Concepts** Wittenberg, Eva,2016-09-01 This dissertation uses a common grammatical phenomenon light verb constructions LVCs in English and German to investigate how syntax semantics mapping defaults influence the relationships between language processing representation and conceptualization LVCs are analyzed as a phenomenon of mismatch in the argument structure The processing implication of this mismatch are experimentally investigated using ERPs and a dual task Data from

these experiments point to an increase in working memory Representational questions are investigated using structural priming Data from this study suggest that while the syntax of LVCs is not different from other structures the semantics and mapping are represented differently This hypothesis is tested with a new categorization paradigm which reveals that the conceptual structure that LVC evoke differ in interesting and predictable ways from non mismatching structures **Second or foreign language learning and cognitive development** Dingfang Shu,Jinfen Xu,Hui Zhang,2024-01-11

Corpus-based Approaches to Construction Grammar Jiyoung Yoon,Stefan Th. Gries,2016-09-08 This volume brings together empirical Construction Grammar studies to i promote cross fertilization between researchers interested in constructional approaches on various languages and ii further the growing trend towards empirically rigorous research that takes seriously a commitment not only to usage based theories but also to usage based methodologies Accordingly the chapters in this volume comprise a range of studies not based on synchronic contemporary English but include Dutch old English Italian and Spanish This volume also features studies from a wider range of statistical sophistication some chapters use more traditional frequency and attestation based approaches some chapters use inferential statistical techniques to explore lexically specific preferences and patterns in constructional slots and some chapters use multifactorial hypothesis testing techniques or multivariate exploratory tools to discover patterns in corpus data that a mere eye balling or simple statistical tools would not uncover
