Vacher,2021-03-29 This book provides two conceptual frameworks for further investigation of map literacy and fills in a gap in map literacy studies addressing the distinction between reference maps and thematic maps and the varying uses of quantitative map literacy QML within and between the two The text offers two conceptual frameworks and uses specific map examples to explore this variability in map reading skills and knowledge with the goal of informing educational pedagogy and practices within geography and related disciplines The book will appeal to cartographers and geographers as a new perspective on a tool of communication they have long employed in their disciplines and will also appeal to those involved in the educational pedagogy of information and data literacy as a way to conceptualize the development of curricula and teaching materials in the increasingly important arena of the interplay between quantitative data and map based graphics The first framework discussed is based on a three set Venn model and addresses the content and relationships of three literacies map literacy quantitative literacy and background information As part of this framework the field of QML is introduced conceptualized and defined as the knowledge concepts skills and facts required to accurately read use interpret and understand the quantitative information embedded in geographic backgrounds The second framework is of a compositional triangle based on 1 the ratio of reference to thematic map purpose and 2 the level of generalization and or distortion within maps In combination these two parameters allow for any type of map to be located within the triangle as a prelude to considering the type and level of quantitative literacy that comes into play during map reading Based on the two frameworks mentioned above the pedagogical tool of word problems is applied to map literacy in an innovative way to explore the variability of map reading skills and knowledge based on specific map examples *Collaboration and Co-Teaching for Dual Language Learners* Joan Lachance,Andrea Honigsfeld,2022-12-13 Teaching dual language learners You re not alone When implemented with commitment to collaboration dual language programs work and two teachers are better than one Leveraging the power of teacher collaboration is the key to leading all your students to multilingual identity development and language literacy and academic success This practical book adapts a widely used evidence based collaboration and co teaching framework specifically for educators in dual language contexts Features include Special consideration to social justice and promoting critical consciousness Viable options for schools districts and state education agencies to effectively support and expand dual language education Seven proven co teaching models newly applied to elementary and secondary dual language environments Templates and tools for collaborative curriculum alignment and implementation of dual language instruction Authentic examples of success from collaborative dual language teams around the US and beyond More and more schools are implementing dual language programs to serve multilingual learners This first of its kind innovative resource helps collaborating educators work together to design deliver and assess engaging instruction for multilingualism and
