Corridors of Contagion
Victoria Law, 2024-09-10 Tracing the narratives of five incarcerated individuals Sentenced to COVID speaks to the devastating impact of surviving the pandemic inside prison walls Corridors of Contagion brings to light the experiences of five people incarcerated across the United States as they navigate the onset of the pandemic and the many months stretched into years that followed Journalist Victoria Law combines this storytelling with a trenchant analysis of the structural failures of the US carceral system failures that made prisons uniquely vulnerable to COVID 19 outbreaks from overcrowding to solitary confinement from insufficient healthcare to life sentences The book portrays the horrors of continual lockdowns not in the comfort of one's own home but in prisons where routine violence and chaos is made even more unimaginable by the complete lack of control over protection from a terrifying and lethal new virus The pandemic provided an opportunity for lawmakers and policy makers to rethink the nation's addiction to perpetual punishment Instead US jails and prisons doubled down on punishment under the guise of pandemic protections As a result people behind bars experienced increased stress mental health challenges increased violence and higher rates of deaths many of which could have been prevented While the pandemic emergency has been declared over we are continuing to learn more about the extent of its destruction Corridors of

Contagion reminds readers about both the particular horrors experienced by people in cages and the continued role of the US as the world's prison nation Calling the Shots Daniel P. Gitterman, 2017-02-14 Modern presidents are CEOs with broad powers over the federal government The United States Constitution lays out three hypothetically equal branches of government the executive the legislative and the judicial but over the years the president as head of the executive branch has emerged as the usually dominant political and administrative force at the federal level In fact Daniel Gitterman tells us the president is effectively the CEO of an enormous federal bureaucracy Using the unique legal authority delegated by thousands of laws the ability to issue executive orders and the capacity to shape how federal agencies write and enforce rules the president calls the shots as to how the government is run on a daily basis Modern presidents have for example used the power of the purchaser to require federal contractors to pay a minimum wage and to prohibit contracting with companies and contractors that knowingly employ unauthorized alien workers Presidents and their staffs use specific tools including executive orders and memoranda to agency heads as instruments of control and influence over the government and the private sector For more than a century they have used these tools without violating the separation of powers Calling the Shots demonstrates how each of these executive powers is a powerful weapon of coercion and redistribution in the president's political and policymaking arsenal *Elite Sport and Sport-for-All* Richard Bailey, Margaret Talbot, 2015-08-11 Sport is often perceived as being divided into two separate domains mass participation and elite In many countries policy and funding in these two fields are managed by separate agencies and investment is often seen as a choice between the two *Elite Sport and Sport for All* explores the points of connection and sources of tension between elite and mass participation sport The book's multi disciplinary and international line up of contributors seeks to define examine and develop solutions to this problematic relationship Drawing on research and case studies from around the world with examples from Denmark Canada South Africa and Israel the book explores key contemporary issues including does effective talent identification require depth of participation do elite performances inspire greater participation the role of the Paralympic movement in mass participation and elite sport and the economic aspects of their co existence The first study of its kind *Elite Sport and Sport for All* addresses a central dichotomy in sport policy and as such is important reading for all students researchers policy makers or administrators working in sport development and policy Trans Talmud Max K. Strassfeld, 2023-10-03 *Trans Talmud* places eunuchs and androgynes at the center of rabbinic literature and asks what we can learn from them about Judaism and the project of transgender history Rather than treating these figures as anomalies to be justified or explained away Max K. Strassfeld argues that they profoundly shaped ideas about law as the rabbis constructed intricate taxonomies of gender across dozens of texts to understand an array of cultural tensions Showing how rabbis employed eunuchs and androgynes to define proper forms of masculinity Strassfeld emphasizes the unique potential of these figures to not only establish the boundary of law but exceed and transform it *Trans Talmud* challenges how we understand gender in Judaism and
