These teachers were required to adopt pedagogies that often represented the antithesis of their well established teacher directed approaches Through the use of Anthony Giddens Theory of Structuration this book provides unique perspectives of the teacher mediated manner in which certain elements of structure and agency interrelate to enable and constrain classroom practices essential understandings for school principals and educational policy developers who aim to effectively implement pedagogical change This book also demonstrates that the Theory of Structuration provides a valuable ontological research framework and provides social researchers with practical guidance for how to relate this theory to specific research issues
