Intelligent Systems Modeling and Simulation III Samsul Ariffin Abdul Karim, 2024-09-21 This book continues the previous edition. Samsul Ariffin Abdul Karim, 2022. Intelligent Systems Modeling and Simulation II: Machine Learning, Neural Networks, Efficient Numerical Algorithms, and Statistical Methods. Studies in Systems, Decision, and Control (SSDC), volume 444. 22k Access. After two years, Intelligent Systems Modeling and Simulation have evolved tremendously through the latest and advanced emergence technologies, and many highly sophisticated algorithms have been developed by blending artificial intelligence (AI) and mathematics, statistics, data modelling, and other related research areas. These blends offer many opportunities and further investigations into the overlap and equality between these areas. It is a well-known fact that most industries and companies have utilized this IR4.0 architecture in various levels of manufacturing and decision processes. Besides, nowadays, IR5.0 or Society 5.0 has also been embedded into various systems in industries as well as in Teaching and Learning (TL). The combination of IR4.0 and Society 5.0 may result in more impactful outcomes, especially in automated decision making and reliable simulations based modelling. Furthermore, IR4.0 and Society 5.0 through Data Driven have made a significant contribution to the government and companies to analyse big data via predictive analytics. Cyber security firewalls on all systems must be up to date to prevent any malicious attacks by hackers. Otherwise, our citizens might be scammed, and according to NBC News, the total loss for 2022 is around USD 8.8 billion. These are very huge amounts. Just recently, COVID-19 has been spreading all over the world again. To assist the Ministry of Health (MOH) and other government agencies, it is very crucial to identify, predict, detect, and quarantine the COVID-19 on the susceptible persons as soon as possible. Intelligent Image Processing techniques are very demanding here. This is to ensure that we can control and minimise the spread. Inspired by these latest developments, in this book, various experts in the areas of Artificial Intelligence, Machine Learning, Deep Learning, Neural Networks, Modeling and Simulation, Cyber Security, and Awareness, Intelligent Statistical Methods, Big Data Analytics, Sentiment Analytics, Intelligent Function Approximation, Image Processing in medical imaging, especially on COVID-19, AI in Teaching and Learning, and Computational Intelligence will
