Cognitive Approaches to Tense, Aspect, and Epistemic Modality Adeline Patard, Frank Brisard, 2011 This volume addresses problems of semantics regarding the analysis of tense and aspect TA markers in a variety of languages including Arabic Croatian English French German Russian Thai and Turkish Its main interest goes out to epistemic uses of such markers whereby epistemic modality is understood as indicating a degree of compatibility between the modal world and the factual world Declerck All contributions moreover tackle these problems from a more or less cognitive point of view with some of them insisting on the need to provide a unifying explanation for all usage types temporal and non temporal and all of them accepting the premise that the semantics of TA categories essentially refers to subjective rather than objective concerns The volume also represents one of the first attempts to gather accounts of TA marking in various languages that are explicitly set within the framework of Cognitive Grammar Ultimately this volume aims to contribute to establishing an awareness that modal meaning elements are directly relevant to the analysis of the grammar of time

Modals in the Languages of Europe Björn Hansen, Ferdinand de Haan, 2009-12-15 This book is the first comprehensive survey of modals and modal constructions in the languages of Europe It is a collaborative effort between scholars from Europe and the United States stemming from a workshop on Modals in the Languages of Europe in Valencia The aim of this book is to describe the properties of modals and modal constructions in the European area and to compare the systems in individual languages or language families from an areal and genetic perspective For the sake of contrast the book also looks at the expression of modality in some languages just outside of

Europe The book consists of fourteen chapters on modal systems in individual languages or language families written by experts in the respective languages and an introductory and concluding chapter written by the editors The book gives both a description of the modals in the individual languages and an account of the nature and status of modals in general It provides the reader with a theoretical account of how modals and modal constructions are grammaticalized This theoretical account is informed by the parameters of grammaticalization of Christian Lehmann These parameters were chosen because they are language independent as opposed to more language specific criteria for instance the NICE criteria for English The parameters themselves are examined as well for their suitability as part of any theory of grammaticalization The book thus gives readers access to a collection of data on modality that surpasses most works in this field and also provides a fresh perspective on issues of grammaticalization and language contact It is therefore of interest to scholars of modality language contact and areal linguistics grammaticalization theory and typology Register, Genre, and Style Douglas Biber, Susan Conrad, 2019-05-16 A brand new edition of this flagship work that provides detailed descriptions of important text varieties in English along with methodological techniques to carry out analyses **Statistics in Corpus Linguistics Research** Sean Wallis, 2020-11-22 Traditional approaches focused on significance tests have often been difficult for linguistics researchers to visualise Statistics in Corpus Linguistics Research A New Approach breaks these significance tests down for researchers in corpus linguistics and linguistic analysis promoting a visual approach to understanding the performance of tests with real data and demonstrating how to derive new intervals and tests Accessibly written this book discusses the why behind the statistical model allowing readers a greater facility for choosing their own methodologies Accessibly written for those with little to no mathematical or statistical background it explains the mathematical fundamentals of simple significance tests by relating them to confidence intervals With sample datasets and easy to read visuals this book focuses on practical issues such as how to pose research questions in terms of choice and constraint employ confidence intervals correctly including in graph plots select optimal significance tests and what results mean measure the size of the effect of one variable on another estimate the similarity of distribution patterns and evaluate whether the results of two experiments significantly differ Appropriate for anyone from the student just beginning their career to the seasoned researcher this book is both a practical overview and valuable resource Modality: Issues in the Semantics-Pragmatics Interface Anna Papafragou, 2021-10-01 This volume focuses on the interplay between grammatical and pragmatic factors in the comprehension of lexically communicated meaning It uses a case study modality in order to illustrate how the plasticity of lexically conveyed information can be accounted for without assuming semantic polysemy The author's approach to the semantics and pragmatics of the English modal verbs is developed within the relevance theoretic framework of communication Introduction to Old English Richard Hogg, 2012-01-17 An student's introduction to the first centuries in the history of the English language The Grammar of Autobiography Jean Quigley, 2000-05 This is the first book to bring together four

distinct literatures functional linguistics child language narrative development and discursive psychology It is an outgrowth of the historical relationship between psychology and linguistics especially the post Wittgensteinian turn to language Relevant issues are situated at that interface in a way that should prove accessible to both linguists with little or no psychological knowledge and to psychologists with no linguistics background are addressed Previously there have been volumes on the theses of discursive psychology and social constructionism and volumes on the workings and theories of functional linguistics but none have attempted to link the two as natural bedfellows in this way While clearly situated within the spirit of the Berkeley school it goes beyond it by virtue of linking functional linguistics and discursive psychology and by doing this ontogenetically Overall this book is an investigation of the psycholinguistic thesis of the social construction of selfhood and the psychology of everyday life Featuring the only book length studies of the use of grammatical analysis as a research strategy in psychology it integrates issues of human development and child language in a new way It deals in careful linguistic analyses examining the role of grammatical forms in constituting context which involves an examination of their functions that are then used to highlight fundamental aspects of development The linguistic analyses are treated as a testing ground for the ideas and claims made in discursive psychology The discussion deals with many of the current issues in psychology and related disciplines including narrative morality agency and responsibility in order to show the central role of language in human functioning

Modals and Periphrastics in English Paul Westney, 2013-02-07 English has a number of periphrastic verbal forms that are semantically close to particular modal verbs and perform suppletive functions in relation to them eg have got to must and be able to can After an exploration of the syntactic semantic and phonological properties of potential periphrastic forms this study investigates the nature of the relationship between the modals must should will and can and various semantically close periphrastics using a spoken corpus of British English as the primary source of data The focus is on the pragmatic interpretation of the items being compared with some attention to their functions in discourse These items are notoriously idiosyncratic both syntactically and semantically but the general contrast claimed by some scholars between the maximally unmarked status of modals and the relatively marked status of periphrastics is amply confirmed and this together with the basic association of modality with alternative possible worlds is shown to be reflected in a number of different ways including the claimed objectivity of periphrastics and the tendency of some to be associated with actuality Level of formality is also found to be a significant though not uniform factor here
