S. Donnelly Jr, 2017-07-06 First published in 1975 Using estate records local newspapers and parliamentary papers this book
focuses upon two central and interrelated subjects the rural economy and the land question from the perspective of Cork
Ireland's southernmost country The author examines the chief responses of Cork landlords tenant farmers and labourers to
the enormous difficulties besetting them after 1815 He shows how the great famine of the late 1840s was in many ways an
economic and social watershed because it rapidly accelerated certain previous trends and reversed the direction of others He
also rejects the conventional view of the land war of the 1880s arguing that in Cork it was essentially a revolution of rising
expectations in which tenant farmers struggled to preserve their substantial material gains since 1850 by using the weapons
of agrarian trade unionism civil disobedience and unprecedented violence This title will be of interest to students of rural

it have been analyzed in considerable detail A body of literature exists for example on the various phases of retailing and

wholesaling The field occupies an important place in the economy and in this study of the development of the wholesaler in
