

- Reboot and FS platform into the EUD
 - o [50671.7.2: Overview of the End User Diagnostic software](#)
 - o [Release Notes: End-User Diagnostic Release Notes](#)
- Download the output from the unit an EUD was run on
- Interpret the output from an EUD and determine if the test passed or failed

Objective 2.02 Interpret the LCD Warning Messages

- Locate the LCD on an FS Platform
- Correlate the LCD message to message in the corresponding log file
- Identify which tasks the buttons on the LCD perform

Objective 2.03 Identify a possible hardware issue with in the log files

- Indicate which logs would contain debugging information

/var/log/messages	System Information
/var/log/pktfilter	Packet Filter Information
/var/log/lbm	Local Traffic Information
/var/log/gtm	Global Traffic Information
/var/log/em	Enterprise Manager Information

- Given a log file, determine the nature of a hardware issue
- Given a possible issue, determine which log file entries to review

Objective 2.04 Perform a failover to a standby box under the appropriate circumstances

- Explain, under which circumstances, a failover would be used to determine if an issue is software or hardware related
- Use failover as a troubleshooting step in an appropriate situation
- Describe the consequences of performing a failover (mirrored connections, persistent connections)
 - o Connection mirroring is not recommended on a virtual server with client side SSL, because the connection will have to be renegotiated after the failover anyway.
 - o All other virtual servers with connection mirroring and/or persistence will be honored as those connection tables are replicated between BIG-IP devices.

Section 3: 9% Troubleshoot basic performance issues

Objective 3.01 Perform a packet capture within the context of a performance issue

- Determine an appropriate location to take the capture
 - o One method is to start in the middle, typically at the BIG-IP. Capture clientside traffic and server side traffic. Compare the two to discover anomalies.
 - o Another method (depends on configuration and resources), is a clientside approach. Perform a packet capture on the client computer while accessing application through BIG-IP and perform another packet capture while accessing the application directly on the same client computer. Compare the two to discover anomalies.
 - o Sometimes a combination of the two is required to gather a full understanding of the problem.
 - o Filter packet captures by interface or VLAN, and hosts in question (client IP, VIP, Server IP/s)
- Determine the appropriate time to take the capture

F5 201 Study Guide

Marcel A. Müller

F5 201 Study Guide:

F5 Networks Application Delivery Fundamentals Study Guide Philip Jönsson, Steven Iveson, 2014-12-14 The only study guide or material you'll need to prepare for the F5 Networks Application Delivery Fundamentals Exam From the author of the most successful popular and bestselling F5 technical books available today and the author of the first freely available study guide for this exam The book's authors have taken great care to ensure all exam topics and fundamental networking areas are covered in full The OSI Model the Data Link Network Transport and Application Layers Switching Routing F5 Solutions Load Balancing Security and Application Delivery Platforms are all covered in depth No prior knowledge or experience is assumed There are 13 chapters 90 diagrams and over 70 test questions to ensure you have everything necessary to prepare for and pass the exam with confidence Download of the PDF file has been disabled **F5 Networks**
