Introducing Teachers and Administrators to the NGSS Eric Brunsell,Deb M. Kneser,Kevin J. Niemi,2014-05-01 If you re charged with helping educators achieve the vision of the new science standards this is the professional development resource you need This book is chock full of activities and useful advice for guiding teachers and administrators as they put the standards into practice in the classroom Written by three experts in professional development for science teachers Introducing Teachers and Administrators to the NGSS Introduces the vocabulary structure and conceptual shifts of the NGSS Explores the three dimensions of the Framework science and engineering practices crosscutting concepts and disciplinary core ideas and how they re integrated in the NGSS Provides classroom case studies of instructional approaches for students challenged by traditional science teaching Covers curricular decisions involving course mapping designing essential questions and performance assessments and using the NGSS to plan units of instruction Examines the connections between the NGSS and the Common Core State Standards Offers advice for getting past common professional development sticking points and finding further resources Given the widespread changes in today s education landscape teachers and administrators may feel overwhelmed by the prospect of putting the new standards into practice If you re a science specialist curriculum coordinator or instructional coach who provides professional development you will find this collection immensely helpful for heading off initiative fatigue whether in an individual school or throughout a district

American Journal of Physics ,1981 **Resources for Teaching Elementary School Science** National Science Resources Center of the National Academy of Sciences and the Smithsonian Institution,1996-03-28 What activities might a teacher use to help children explore the life cycle of butterflies What does a science teacher need to conduct a leaf safari for students Where can children safely enjoy hands on experience with life in an estuary Selecting resources to teach elementary school science can

be confusing and difficult but few decisions have greater impact on the effectiveness of science teaching Educators will find a wealth of information and expert guidance to meet this need in Resources for Teaching Elementary School Science A completely revised edition of the best selling resource guide Science for Children Resources for Teachers this new book is an annotated guide to hands on inquiry centered curriculum materials and sources of help in teaching science from kindergarten through sixth grade Companion volumes for middle and high school are planned The guide annotates about 350 curriculum packages describing the activities involved and what students learn Each annotation lists recommended grade levels accompanying materials and kits or suggested equipment and ordering information These 400 entries were reviewed by both educators and scientists to ensure that they are accurate and current and offer students the opportunity to Ask questions and find their own answers Experiment productively Develop patience persistence and confidence in their own ability to solve real problems The entries in the curriculum section are grouped by scientific area Life Science Earth Science Physical Science and Multidisciplinary and Applied Science and by type core materials supplementary materials and science activity books Additionally a section of references for teachers provides annotated listings of books about science and teaching directories and guides to science trade books and magazines that will help teachers enhance their students science education Resources for Teaching Elementary School Science also lists by region and state about 600 science centers museums and zoos where teachers can take students for interactive science experiences Annotations highlight almost 300 facilities that make significant efforts to help teachers Another section describes more than 100 organizations from which teachers can obtain more resources And a section on publishers and suppliers give names and addresses of sources for materials The guide will be invaluable to teachers principals administrators teacher trainers science curriculum specialists and advocates of hands on science teaching and it will be of interest to parent teacher organizations and parents

Generative AI in Higher Education Cecilia Ka Yuk Chan, Tom Colloton, 2024-03-21 Chan and Colloton s book is one of the first to provide a comprehensive examination of the use and impact of ChatGPT and Generative AI GenAI in higher education Since November 2022 every conversation in higher education has involved ChatGPT and its impact on all aspects of teaching and learning The book explores the necessity of AI literacy tailored to professional contexts assess the strengths and weaknesses of incorporating ChatGPT in curriculum design and delve into the transformation of assessment methods in the GenAI era The authors introduce the Six Assessment Redesign Pivotal Strategies SARPS and an AI Assessment Integration Framework encouraging a learner centric assessment model The necessity for well crafted AI educational policies is explored as well as a blueprint for policy formulation in academic institutions Technical enthusiasts are catered to with a deep dive into the mechanics behind GenAI from the history of neural networks to the latest advances and applications of GenAI technologies With an eye on the future of AI in education this book will appeal to educators students and scholars interested in the wider societal implications and the transformative role of GenAI in pedagogy and research The Open Access version of

this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license *Resources in Education* ,1995-04 **Learning Science in the Schools** Shawn M. Glynn,Reinders Duit,2012-10-12 Science and the technology derived from it is having a dramatic impact on the quality of our personal lives and the environment around us Science will have an even greater impact on the lives of our students The lives of scientifically literate students will be enriched by their understanding appreciation and enjoyment of the natural world To prosper in the near future all students must become scientifically literate and embrace the notion of life long learning in science Without scientific literacy it will become impossible for students to make informed decisions about the interrelated educational scientific and social issues that will confront them in the future Intended for science teachers teacher educators researchers and administrators this volume is concerned with the innovative research that is reforming how science is learned in schools The chapters provide overviews of current research and illustrate how the findings of this research are being applied in schools This research based knowledge is essential for effective science instruction The contributors are leading authorities in science education and their chapters draw clear connections among research theory and classroom practice They provide excellent examples from science classes in which their research has reformed practice This book will help educators develop the scientific literacy of students It bridges the gap between cutting edge research and classroom practice to provide educators with the knowledge they need to foster students scientific literacy
