Implications of community-based legal aid regulation on women's land rights Billings, Lucy, Meinzen-Dick, Ruth Suseela, Mueller, Valerie, 2014 Improving women's ability to securely access land is recognized as an effective means to increase gender equality and advance other key social and economic development goals Despite progressive laws in many

African countries gender disparities commonly persist in women's access and ownership of land. Although legal empowerment of women can help to strengthen their claims to land, developing country governments commonly lack the capacity to offer legal services. Civil society is increasingly stepping in to fill the wide gap in legal service provision with the aim of empowering marginalized groups and individuals to exercise their legal rights. Although legal aid has wide application, this brief focuses on the consequences of regulating services provided at the community level to support women's land rights.

Routledge Handbook of Ecological and Environmental Restoration Stuart K. Allison, Stephen D. Murphy, 2017-05-18. Ecological restoration is a rapidly evolving discipline that is engaged with developing both methodologies and strategies for repairing damaged and polluted ecosystems and environments. During the last decade, the rapid pace of climate change coupled with continuing habitat destruction and the spread of non-native species to new habitats has forced restoration ecologists to re-evaluate their goals and the methods they use. This comprehensive handbook brings together an internationally respected group of established and rising experts in the field. The book begins with a description of current practices and the state of knowledge in particular areas of restoration and then identifies new directions that will help the field achieve increasing levels of future success. Part I provides basic background about ecological and environmental restoration. Part II systematically reviews restoration in key ecosystem types located throughout the world. In Part III, management and policy issues are examined in detail, offering the first comprehensive treatment of policy relevance in the field, while Part IV looks to the future. Ultimately, good ecological restoration depends upon a combination of good science, policy, planning, and outreach. All issues that are addressed in this unrivalled volume.
