**Burnt by Democracy** Jacqueline Kennelly,2023-11-30 Burnt by Democracy traces the political ascendance of neoliberalism and its effects on youth The book explores democracy and citizenship as described in interviews with over forty young people ages 16 to 30 who have either experienced homelessness or identify as an activist living in five liberal democracies Canada Australia New Zealand the United States and the United Kingdom Highlighting significant cuts to social and affordable housing astronomical increases in the costs of higher education and the transformation and erosion of state benefits systems Jacqueline Kennelly argues that democracy s decline is not occurring because young people are apathetic or focused on informal politics or unaware of their civic duties Rather it is because of collective misunderstanding about how democracy is actually structured how individuals learn to participate and how growing wealth inequality has undermined the capacity of those at the bottom to meaningfully advocate for changes that might improve their conditions Against a vivid and often heart breaking backdrop of stories from young people struggling to survive and thrive under conditions of ever expanding state retrenchment and inequality Burnt by Democracy makes a timely and impassioned plea for protecting and strengthening democracy by truly levelling the playing field for all

Panel Data Econometrics Mike Tsionas,2019-06-20 Panel Data Econometrics Empirical Applications introduces econometric modelling Written by experts from diverse disciplines the volume uses longitudinal datasets to illuminate

applications for a variety of fields such as banking financial markets tourism and transportation auctions and experimental economics Contributors emphasize techniques and applications and they accompany their explanations with case studies empirical exercises and supplementary code in R They also address panel data analysis in the context of productivity and efficiency analysis where some of the most interesting applications and advancements have recently been made Provides a vast array of empirical applications useful to practitioners from different application environments Accompanied by extensive case studies and empirical exercises Includes empirical chapters accompanied by supplementary code in R helping researchers replicate findings Represents an accessible resource for diverse industries including health transportation tourism economic growth and banking where researchers are not always econometrics experts Economics of Grids, Clouds, Systems, and Services José Ángel Bañares, Jörn Altmann, Orna Agmon Ben-Yehuda, Karim Djemame, Vlado Stankovski, Bruno Tuffin, 2023-03-30 This book constitutes the refereed proceedings of the 19th International Conference on Economics of Grids Clouds Systems and Services GECON 2022 held in Izola Slovenia in September 2022 The 4 full papers presented in this book were carefully reviewed and selected from 22 submissions In addition this book includes 6 work in progress papers 4 new ideas paper and two invited papers This series of conferences serves as a meeting place to bring together distributed systems expertise e g in resource allocation quality of service management and energy consumption with economics expertise focusing on both micro and macro economic modelling and analysis for creating effective solutions in this space *The effect of land inheritance on youth employment and migration decisions: Evidence from rural Ethiopia* Kosec, Katrina, Ghebru, Hosaena, Holtemeyer, Brian, Mueller, Valerie, Schmidt, Emily, 2017-03-28 In Ethiopia there are two binding forces push and pull that deserve attention when it comes to youth occupational and spatial mobility choices and the national land use and transfer policy On the one hand the fact that the land rental market in Ethiopia is supply constrained due to market and policy distortions marginalizes youth and serves as a push factor leading them to look elsewhere for a livelihood strategy On the other hand the regulatory conditions and restrictions attached to land use and inheritance rights may serve as a pull factor and force youth to be tied to the rural and or farming sector Our study thus aims to explore how youth land access both inheritance and market based affects their migration and employment decisions We explore this question in the context of rural Ethiopia using panel data from 2010 and 2014 We find that larger expected land inheritances significantly lower the likelihood of long distance permanent migration and of permanent migration to urban areas during this time Inheriting more land is also associated with a significantly higher likelihood of employment in agriculture and a lower likelihood of employment in the nonagricultural sector Conversely the decision to attend school is unaffected These results appear to be most heavily driven by males and by the older half of our youth sample We also find several mediating factors matter Land inheritance plays a much more pronounced role in predicting rural to urban permanent migration and nonagricultural sector employment in areas with less vibrant land markets and in relatively remote areas those far from

major urban centers Overall the results reaffirm the notion that push factors dominate pull factors in dictating occupational and migration decisions in Ethiopia and highlight youth preferences to use migration or non agricultural employment as a last resort after exhausting other means of accessing land such as temporary land rental

The Morality of Radical Economics Ron P. Baiman, 2016-08-31 This book is in equal parts a treatise on morality and economics a critique of neoclassical orthodoxy a brief for replacing mainstream economics with a radical political economics and an argument for the abandonment of neoliberal capitalism in favor of democratic socialism It includes a detailed proposal for a demand and cost alternative to supply and demand analysis and an in depth technical critique of both neoclassical high theory and applied microeconomic analysis demonstrating that these are not only infeasible or immoral but have directly contributed to public policy disasters Further the book suggests that only a moral economics in the form of radical political economy can address the looming economic and environmental crises of today's world Baiman begins with an introduction to morality and ethics in both general sciences and in economics in particular He then guides readers through evidence of how neoclassical economics has not only failed to remain objective and value free but has become an ideology of apologetics protecting an immoral system In addition to breaking down real world examples to demonstrate his assertions Baiman analyzes a theoretical Utopia design exercise He concludes by arguing that the only form of economics that supports widely shared human values such as social equity democracy and solidarity is so called radical economics and that all true economics science should be directed toward achieving more socially productive economic activity An invaluable guide to morality and economics this book will appeal to researchers and teachers looking to change the way we think about economics policy and society

**Trust, Voice, and Incentives** Hana Bixi, Ellen Lust, Michael Woolcock, 2015-05-29 This report examines the role of incentives trust and engagement as critical determinants of service delivery performance in MENA countries Focusing on education and health the report illustrates how the weak external and internal accountability undermines policy implementation and service delivery performance and how such a cycle of poor performance can be counteracted Case studies of local success reveal the importance of both formal and informal accountability relationships and the role of local leadership in inspiring and institutionalizing incentives toward better service delivery performance Enhancing services for MENA citizens requires forging a stronger social contract among public servants citizens and service providers while empowering communities and local leaders to find best fit solutions Learning from the variations within countries especially the outstanding local successes can serve as a solid basis for new ideas and inspiration for improving service delivery Such learning may help the World Bank Group and other donors as well as national and local leaders and civil society in developing ways to enhance the trust voice and incentives for service delivery to meet citizens needs and expectations
