Make the Grade: A Review of the Causes and Consequences of the Weak Outcomes of South Africa's Education

System Mr. Montfort Mlachila, Tlhalefang Moeletsi, 2019-03-01 While South Africa has made significant improvements in basic and tertiary education enrollment the country still suffers from significant challenges in the quality of educational achievement by almost any international metric The paper finds that money is clearly not the main issue since the South Africa's education budget is comparable to OECD countries as a percent of GDP and exceeds that of most peer sub-Saharan African countries in per capita terms The main explanatory factors are complex and multifaceted and are associated with insufficient subject knowledge of some teachers history race language geographic location and socio-economic status Low educational achievement contributes to low productivity growth and high levels of poverty unemployment and inequality Drawing on the literature the paper sketches some policy considerations to guide the debate on what works and what does not

Research Methods in Consumer Law Hans-W. Micklitz, Anne-Lise Sibony, Fabrizio Esposito, Consumer law is worthy of greater academic attention at a time when many new questions arise and old ones need new answers This unique handbook takes the reader on a journey through existing literature research questions and methods It builds on the state of the art to offer a springboard for jumping to the heart of contemporary issues and equips researchers with a starter's kit to weave together rich traditions ranging from socio-economics to behavioural analysis *The Price of Fixed Income Market*

Volatility Antonio Mele, Yoshiki Obayashi, 2016-01-11 Fixed income volatility and equity volatility evolve heterogeneously over time co-moving disproportionately during periods of global imbalances and each reacting to events of different nature While the methodology for options based model free pricing of equity volatility has been known for some time little is known about analogous methodologies for pricing various fixed income volatilities This book fills this gap and provides a unified evaluation framework of fixed income volatility while dealing with disparate markets such as interest rate swaps government bonds time deposits and credit It develops model free forward looking indexes of fixed income volatility that match different quoting conventions across various markets and uncovers subtle yet important pitfalls arising from naive superimpositions of the standard equity volatility methodology when pricing various fixed income volatilities **Improving a Country's Education**

Nuno Crato, 2020-11-23 This open access book compares and contrasts the results of international student assessments in ten countries The OECD's Programme for International Student Assessment PISA released the results of its 2018 assessment in December 2019 This book reflects the debates that typically follow the release of these results and focuses on the causes of differences between countries Such causes include continuous decline in one country improvement combined with increasing

internal inequalities in another country or rapid improvement in spite of an outdated curriculum in yet another. In addition, the book discusses a number of general questions: Is knowledge outdated? Are computers taking over and replacing teachers? Are schools killing creativity? Are we adequately preparing the next generation? Are schools failing to educate our kids? The book starts out with a summary of PISA's evolution and PISA results and an explanation of the major factors that play a role in changes in countries' results. The next ten chapters are devoted to ten specific countries, offering a summary of data and an explanation of the major drives for changes in education results for each one. Each chapter includes a short description of the country's educational system as well as the impact of PISA and other ILSA studies on the country's educational policies. The chapters also include a timeline of policy measures and main hallmarks of the country's educational evolution, discussing the impact of these measures on its PISA results. A final reference chapter explains what PISA is, what it measures, and how. While highlighting the 2018 results, the book also takes into consideration previous results as well as long-term initiatives. This book gathers the contribution of well-known and respected experts in the field. Specialists such as Eric Hanushek for the US, Tim Oates for England, Montse Gomendio for Spain, Gunda Tire for Estonia, and all other contributors draw on their vast experience and statistical analysis expertise to draw a set of rich country lessons and recommendations that are invaluable for all of those who care about improving a country's education system. *Mining Journal, Railway & Commercial Gazette*, 1907

Restoring Opportunity Greg J. Duncan, Richard J. Murnane, 2014-01-01 In this landmark volume Greg J Duncan and Richard J Murnane lay out a meticulously researched case showing how in a time of spiraling inequality strategically targeted interventions and supports can help schools significantly improve the life chances of low income children The authors offer a brilliant synthesis of recent research on inequality and its effects on families children and schools They describe the interplay of social and economic factors that has made it increasingly hard for schools to counteract the effects of inequality and that has created a widening wedge between low and high income students *Restoring Opportunity* provides detailed portraits of proven initiatives that are transforming the lives of low income children from prekindergarten through high school All of these programs are research tested and have demonstrated sustained effectiveness over time and at significant scale Together they offer a powerful vision of what good instruction in effective schools can look like The authors conclude by outlining the elements of a new agenda for education reform *Restoring Opportunity* is a crowning contribution from these two leading economists in the field of education and a passionate call to action on behalf of the young people on whom our nation's future depends Copublished with the Russell Sage Foundation

Qualities of Effective Principals James H. Stronge, Xianxuan

Xu, 2021-04-28 What does it take to be a good school principal? No two principals work exactly the same way, but research shows that effective principals focus on a core set of factors critical to fostering success among all students. In this second edition of *Qualities of Effective Principals*, James H. Stronge and Xianxuan Xu delineate these factors and show principals how to successfully balance the needs and priorities of their schools while continuously developing and refining their leadership skills. Throughout the book, the authors provide practical tools and extensive research that will help principals assess, exhibit, and harness instructional leadership to meet a school's goals, foster and sustain an effective school climate for learning, select support and retain high quality teachers and staff, manage school resources effectively and efficiently, create, maintain, and strengthen internal and external community relationships, and define their role in student achievement. This book also includes practical skills, checklists, along with quality indicators and red flags for effective leadership. *Qualities of Effective Principals* 2nd Edition is an excellent resource for both experienced and new principals committed to developing and leading strong schools that help all students succeed.

Understanding Juvenile Justice and Delinquency Marilyn D.

McShane, Michael Cavanaugh, 2015-11-10 This book provides a comprehensive, cutting-edge look at the problems that impact the way we conduct intervention and treatment for youth in crisis. Today, an indispensable resource for practitioners, students, researchers, policymakers, and faculty working in the area of juvenile justice, *Understanding Juvenile Justice and Delinquency* provides a concise overview of the most compelling issues in juvenile delinquency today. It covers not only the range of offenses but also the offenders themselves as well as those impacted by crime and delinquency. All of the chapters contain up-to-date research, laws, and data that accurately frame discussions on youth violence, detention, and treatment-related issues such as gangs and drugs, the consequences for scholars, teachers, and students, and best practices in intervention methods. The book's organization guides readers logically from the broader definitions and parameters of the study of juveniles to the more specific. The volume leads with an explanation of the relationship between victimization and juvenile behavior and sets up boundaries of the arenas of delinquency from the family to the streets to cyberspace. The book then focuses on more specific populations of offenders and offenses, including recent emerging issues, offering the most accurate information available and cutting-edge insight into the issues that affect youth in custody and in our communities.

Food and Cooking Skills

Education Anita Tull, 2018-01-29 Food and Cooking Skills Education (FCSE) is a complex mix of policy and practicality, educational theory and pedagogy, classroom and government policy. This book shows how FCSE has been at the centre of a tussle between education and policy for decades. It reviews how FCSE has grappled with various significant issues of concern.

that threaten to marginalise it and pose problems for educational practicalities as expectations are increased but resources are squeezed. It assesses the debate about the significance and importance of acquiring practical food and cooking skills in a society where the purchase of ready made food has become commonplace and public knowledge of where our food comes from is noticeably lacking. This has contributed to the escalating incidence of diet related diseases and the attendant cost to society and threatened environmental sustainability. In turn governments have reacted by proposals to make practical cooking skills a statutory National Curriculum subject as part of the armoury for tackling such costs. Based on detailed research conducted across England and Wales as well as comparisons with thirty five other countries or states the author makes recommendations for policy to manage this challenge facing contemporary society.
