**The EU's Government of Industries** Bernard Jullien, Andy Smith, 2014-08-13 To what extent is business activity governed at a European scale Since the advent of the recent economic crisis the EU's choices about the euro debt ratios and interest rates have caught the headlines and highlighted the importance of EU decision making arenas However these macro economic events actually tell us only part of the story about the extent to which business activity is now governed at a European scale Based upon original research on four manufactured or processed goods industries cars wine pharmaceuticals and aquaculture and driven by theory that is constructivist institutionalist and sociological this book sets out to analyse just what Europe governs by whom and why In doing so it reveals three recurrent features of the European government of industries its omnipresence its incompleteness and its de politicization The authors show that the many gaps in the EU's mode of governing industries stem from struggles over economic doctrine as well as the continued unwillingness of many actors to accord the EU a legitimacy to act politically in the name of industrial government This book will be of key interest to scholars and students of European Studies and Political Economy as well as those studying Political Science Economics Sociology and Business Studies      The Future of Liberal Education Timothy Burns, Peter Lawler, 2016-04-14 Liberal Education once the whole of American Higher Education has been displaced by technical training and career oriented majors But it has also suffered from the decline in genuine liberal learning found in humanities disciplines owing to specialization politicization and the adoption of new literary and psychological theories The social sciences too have arguably abandoned the kind of relentless and sometimes disturbing questioning that used to constitute the core of education In this compelling volume thirteen college educators describe in sparkling prose what liberal education is its place in a liberal democracy the

very serious challenges it faces in the 21st century even from some of its alleged friends and why it is important to sustain and expand liberal education's place in American colleges and universities Proponents and critics of liberal education alike will benefit from these insightful essays This book was originally published as a special issue of Perspectives on Political Science

The Power of Bad John Tierney, Roy F. Baumeister, 2021-01-05 The most important book at the borderland of psychology and politics that I have ever read Martin E P Seligman Zellerbach Family Professor of Psychology at that University of Pennsylvania and author of *Learned Optimism* Why are we devastated by a word of criticism even when it's mixed with lavish praise Because our brains are wired to focus on the bad This negativity effect explains things great and small why countries blunder into disastrous wars why couples divorce why people flub job interviews how schools fail students why football coaches stupidly punt on fourth down All day long the power of bad governs people's moods drives marketing campaigns and dominates news and politics Eminent social scientist Roy F Baumeister stumbled unexpectedly upon this fundamental aspect of human nature To find out why financial losses mattered more to people than financial gains Baumeister looked for situations in which good events made a bigger impact than bad ones But his team couldn't find any Their research showed that bad is relentlessly stronger than good and their paper has become one of the most cited in the scientific literature Our brain's negativity bias makes evolutionary sense because it kept our ancestors alert to fatal dangers but it distorts our perspective in today's media environment The steady barrage of bad news and crisis-mongering makes us feel helpless and leaves us needlessly fearful and angry We ignore our many blessings preferring to heed and vote for the voices telling us the world is going to hell But once we recognize our negativity bias the rational brain can overcome the power of bad when it's harmful and employ that power when it's beneficial In fact bad breaks and bad feelings create the most powerful incentives to become smarter and stronger Properly understood bad can be put to perfectly good use As noted science journalist John Tierney and Baumeister show in this wide-ranging book we can adopt proven strategies to avoid the pitfalls that doom relationships careers businesses and nations Instead of despairing at what's wrong in your life and in the world you can see how much is going right and how to make it still better

Poverty And Proficiency: The Cost Of And Demand For Local Public Education (A Textbook In Education Finance) John Yinger, 2020-02-27 This book covers a wide range of topics in education finance It is designed to introduce the literature on education finance to scholars and prospective scholars and can be used as a textbook for a graduate level education finance class The topics in the book include the incidence of the property tax as a source of revenue for elementary and secondary education how much more it costs to reach a state's education targets in a high poverty school district than in a rich district the design of state education aid programs the impact of school quality on house values the cost implications of school district consolidations and the impact of state aid on school infrastructure

*Economic Governance in Europe* Federico Fabbrini, 2016-01-28 The Euro Crisis and the legal and institutional responses to it have had important constitutional implications on the architecture of the

European Union EU Going beyond the existing literature Federico Fabbrini's book takes a broad look and examines how the crisis and its aftermath have changed relations of power in the EU disaggregating three different dimensions 1 the vertical relations of power between the member states and the EU institutions 2 the relations of power between the political branches and the courts and 3 the horizontal relations of power between the EU member states themselves The first part of the book argues that in the aftermath of the Euro crisis power has been shifting along each of these axes in paradoxical ways In particular through a comparison of the United States Fabbrini reveals that the EU is nowadays characterized by a high degree of centralization in budgetary affairs an unprecedented level of judicialization of economic questions and a growing imbalance between the member states in the governance of fiscal matters As the book makes clear however each of these dynamics is a cause for concern as it calls into question important constitutional values for the EU such as the autonomy of the member states in taking decision about taxing and spending the preeminence of the political process in settling economic matters and the balance between state power and state equality The second part of the book therefore devises possible options for future legal and institutional developments in the EU which may revert these paradoxical trends In particular Fabbrini considers the ideas of raising a fiscal capacity restoring the centrality of the EU legislative process and reforming the EU executive power and discusses the challenges that accompany any further step towards a deeper Economic and Monetary Union
