### **The effect of land inheritance on youth employment and migration decisions: Evidence from rural Ethiopia**

Kosec, Katrina, Ghebru, Hosaena, Holtemeyer, Brian, Mueller, Valerie, Schmidt, Emily, 2017-03-28 In Ethiopia there are two binding forces push and pull that deserve attention when it comes to youth occupational and spatial mobility choices and the national land use and transfer policy On the one hand the fact that the land rental market in Ethiopia is supply constrained due to market and policy distortions marginalizes youth and serves as a push factor leading them to look elsewhere for a livelihood strategy On the other hand the regulatory conditions and restrictions attached to land use and inheritance rights may serve as a pull factor and force youth to be tied to the rural and or farming sector Our study thus aims to explore how youth land access both inheritance and market based affects their migration and employment decisions We explore this question in the context of rural Ethiopia using panel data from 2010 and 2014 We find that larger expected land inheritances significantly lower the likelihood of long distance permanent migration and of permanent migration to urban areas during this time Inheriting more land is also associated with a significantly higher likelihood of employment in agriculture and a lower likelihood of employment in the nonagricultural sector Conversely the decision to attend school is unaffected These results appear to be most heavily driven by males and by the older half of our youth sample We also find several mediating factors matter Land inheritance plays a much more pronounced role in predicting rural to urban permanent migration and nonagricultural sector employment in areas with less vibrant land markets and in relatively remote areas those far from major urban centers Overall the results reaffirm the notion that push factors dominate pull factors in dictating occupational and migration decisions in Ethiopia and highlight youth preferences to use migration or non agricultural employment as a last resort after exhausting other means of accessing land such as temporary land rental

**Economics of Means-Tested Transfer Programs in the United States, Volume II** Robert A. Moffitt, 2016-11-18 Few government programs in the United States are as controversial as those designed to help the poor. From tax credits to medical assistance, the size and structure of the American safety net is an issue of constant debate. These two volumes update the earlier Means Tested Transfer Programs in the United States with a discussion of the many changes in means tested government programs and the results of new research over the past decade. While some programs that experienced falling outlays in the years prior to the previous volume have remained at low levels of expenditure, many others have grown, including Medicaid, the Earned Income Tax Credit, the Supplemental Nutrition Assistance Program, and subsidized housing programs. For each program, the contributors describe its origins and goals, summarize its history and current rules, and discuss recipients' characteristics and the types of benefits they receive. This is an invaluable reference for researchers and policy makers that features detailed analyses of many of the most important transfer programs in the United States.

**The Inner Level** Richard Wilkinson, Kate Pickett, 2018-06-07 Why is the incidence of mental illness in the UK twice that in Germany Why are Americans three times more likely than the Dutch to develop gambling problems Why is child well being so much worse in New Zealand than Japan As this groundbreaking study demonstrates the answer to all these hinges on inequality In *The Spirit Level* Richard Wilkinson and Kate Pickett put inequality at the centre of public debate by showing conclusively that less equal societies fare worse than more equal ones across everything from education to life expectancy *The Inner Level* now explains how inequality affects us individually how it alters how we think feel and behave It sets out the overwhelming evidence that material inequalities have powerful psychological effects when the gap between rich and poor increases so does the tendency to define and value ourselves and others in terms of superiority and inferiority A deep well of data and analysis is drawn upon to empirically show for example that low social status is associated with elevated levels of stress and how rates of anxiety and depression are intimately related to the inequality which makes that status paramount Wilkinson and Pickett describe how these responses to hierarchies evolved and why the impacts of inequality on us are so severe In doing so they challenge the conception that humans are innately competitive and self interested They undermine too the idea that inequality is the product of natural differences in individual ability This book sheds new light on many of the most urgent problems facing societies today but it is not just an index of our ills It demonstrates that societies based on fundamental equalities sharing and reciprocity generate much higher levels of well being and lays out the path towards them

*Reconstructing the Middle East* Abdulwahab Alkebsi, Nathan J Brown, Charlotta Sparre, 2017-02-24 It is clear by now that the label Arab Spring has proven too simplistic to describe the uprisings that upended the political order of the Arab world in late 2010 Brutal crackdowns and civil conflict in Syria Libya and Yemen dashed the hopes that peaceful democratic revolutions would sweep the region In other countries the departure of authoritarian leaders led to many false starts without producing democratic conclusions Societies that had appeared united in opposition suddenly seemed fractious Youth were once again banished to the political margins *Reconstructing the Middle East* examines the changes that happened within the region from 2010 and the long term challenges and opportunities they present Featuring the work of authors with a diversity of perspectives most of whom hail from the region it addresses key issues of political economic and societal changes the role of young people and of the international community In addition the book deals with the questions of both political and economic reform and the intertwined nature of the two Political reform that allows greater participation will fail to quell frustration if Arabs continue

to feel that their job prospects are bleak Similarly Arabs will not accept economic reform that restores growth but continues to fence off the political sphere This book offers a unique perspective on the uprisings by focusing on specific issue areas where change is needed and offering a roadmap for the long road towards state building and new social contracts based on political inclusion respect for pluralism and sustained economic growth As such it will be a valuable resource for students and scholars of Middle East Politics as well as those with an interest in the Arab Spring

Governance and sector outcomes Anna Wetterberg, Derick W. Brinkerhoff, 2018-09-27 A critical issue in international development is how donor funded programs can support sustainable and long lasting changes in assisted countries Among the factors associated with sustainability is improved governance However many donor funded initiatives are focused on achieving results in specific sectors such as health education and agriculture How can how governance interventions contribute to achieving sector specific results This brief explores this question and discusses how international development practice has incorporated recognition of the links between governance and sector outcomes The brief develops a stylized continuum of how governance elements relate to sector interventions and contribute to expected outcomes We discuss factors that either impede or impel governance integration and close with some observations regarding prospects for integrated programming The audience for the brief is the international development policy and practitioner communities and secondarily academics with an interest in the topic Key take aways include 1 there is ample evidence of positive contributions from improved governance to sector specific outcomes but few guideposts exist for practical and effective governance integration 2 barriers to integration include urgent sector priorities that overshadow governance concerns requirements to demonstrate progress towards ambitious sector targets and complex choices related to measurement and 3 sustainability and self reliance are major drivers for integration and are facilitated by the flexibility and adaptation that governance integration enables
