Spending on effective programs for young children is an investment that if done well will have very high returns, while failure to implement such programs will lower the returns on the hefty investments being made in primary, secondary, and higher education. Policies for young children belong at the core of a country's development agenda alongside policies to develop infrastructure and strengthen institutions. However, if the services provided or funded by governments are to benefit children, they must be substantially better than what is currently being delivered in the region. This book offers suggestions for improving public policy in this critical area.      *The Greening of Pharmaceutical Engineering, Practice, Analysis, and Methodology* M. R. Islam, Jaan S.
