The Case against Education Bryan Caplan, 2019-08-20 Why we need to stop wasting public funds on education Despite being immensely popular and immensely lucrative education is grossly overrated Now with a new afterword by Bryan Caplan this explosive book argues that the primary function of education is not to enhance students skills but to signal the qualities of a good employee Learn why students hunt for easy As only to forget most of what they learn after the final exam why decades of growing access to education have not resulted in better jobs for average workers how employers reward workers for costly schooling they rarely ever use and why cutting education spending is the best remedy Romantic notions about education being good for the soul must yield to careful research and common sense The Case against Education points the way *Academic Framework for 21st-Century Schooling: Promoting Global Peace and Harmony* Mukhopadhyay,

Because authoritarian regimes like North Korea can impose the costs of sanctions on their citizens, these regimes constitute hard targets. Yet authoritarian regimes may also be immune and even hostile to economic inducements if such inducements imply reform and opening. This book captures the effects of sanctions and inducements on North Korea and provides a detailed reconstruction of the role of economic incentives in the bargaining around the country's nuclear program. Stephan Haggard and Marcus Noland draw on an array of evidence to show the reluctance of the North Korean leadership to weaken its grip on foreign economic activity. They argue that inducements have limited effect on the regime and instead urge policymakers to think in terms of gradual strategies. Hard Target connects economic statecraft to the marketization process to understand North Korea and addresses a larger debate over the merits and demerits of engagement with adversaries.
