**Next Generation Performance Management** Alan L. Colquitt, 2017-08-01 There is no HR related topic more popular in the business press than performance management PM There has been an explosion in writing on this topic in the past 5 years condemning it as a failure and calling for fundamental change The vast majority of organizations use the same basic process which I call Last Generation Performance Management or PM 1.0 for short Despite widespread agreement that PM 1.0 is failing few companies have abandoned it or made fundamental changes to it While everyone agrees it is broken few agree on how to fix it Companies continue to tinker with their systems making incremental changes every few years with no lasting improvement in effectiveness Employees continue to achieve amazing things in organizations every day despite this process not because of it Nothing has worked because organizations business leaders and HR professionals focus on PM practices instead of the fundamental purpose of PM and the paradigms assumptions and beliefs that underlie the practices Companies ask their performance management process to do too many things and it fails at all of them as a result At the foundation of PM 1.0 practices is the ideology of a meritocracy and paradigms rooted in standard economic and psychological theories While these theories were adequate explanations for motivation and behavior in the 19th and 20th centuries they fail to account for the increasingly complex nature of organizations and their environments today Despite the ineffectiveness of PM 1.0 there are powerful forces holding it in place Information on rigorous evidence based recommendations is crowded out by benchmarking information case studies of high profile companies and other propaganda coming from HR think tanks and consultants Business leaders and HR professionals learn about common practices not effective practices This book confronts the traditional dogma paradigms and practices of PM 1.0 and holds them up to the bright light of scientific scrutiny It encourages HR professionals and business leaders to abandon PM 1.0 and it offers up a more appropriate purpose for PM alternative paradigms to guide them and practical solutions that are better supported by scientific research referred to as Next Generation Performance Management or PM 2.0 for short

The Tyranny of Metrics Jerry Z. Muller, 2019-04-30 Today organizations of all kinds are ruled by the belief that the path to success is quantifying human performance publicizing the results and dividing up the rewards based on the numbers But in our zeal to instill the evaluation process with scientific rigor we've gone from measuring performance to fixating on measuring itself The result is a tyranny of metrics that threatens the quality of our lives and most important institutions In this timely and powerful book Jerry Muller uncovers the damage our obsession with metrics is causing and shows how we can begin to fix the problem Filled with examples from education medicine business and finance government the police and military and philanthropy and foreign aid this brief and accessible book explains why the seemingly irresistible pressure to quantify performance distorts and distracts whether by encouraging gaming the stats or teaching to the test That's because what can and does get measured is not always worth measuring may not be what we really want to know and may draw effort away from the things we care about Along the way we learn why paying for measured performance doesn't work why surgical scorecards may increase deaths and much more But metrics can be good when used as a complement to rather than a replacement for judgment based on personal experience and Muller also gives examples of when metrics have been

beneficial Complete with a checklist of when and how to use metrics The Tyranny of Metrics is an essential corrective to a rarely questioned trend that increasingly affects us all
