Grade 1 Economics Paper 2 Essay Questions 2014:

The Unmaking of Arab Socialism Ali Kadri, 2016-10-01 Conditions of malnutrition conflict or a combination of both characterize many Arab countries but this was not always so. As in much of the developing world the immediate post independence period represented an age of hope and relative prosperity. But imperialism did not sleep while these countries developed and it soon intervened to destroy these post independence achievements. The two principal defeats and losses of territory to Israel in 1967 and 1973 as well as the others that followed left in their wake more than the destruction of assets and the loss of human lives. The Arab World lost its ideology of resistance. The Unmaking of Arab Socialism is an attempt to understand the reasons for Arab world's developmental descent from the pinnacle of Arab socialism to its present desolate conditions through an examination of the post colonial histories of Egypt, Syria and Iraq.

The Transnationalized Social Question Thomas Faist, 2019 The social question is back. Yet today's social question is not primarily between labour and capital as it was in the nineteenth century and throughout much of the twentieth. The contemporary social question is located at the interstices between the global South and the global North. It finds its expression in movements of people seeking a better life or fleeing unsustainable social, political, economic and ecological conditions. It is transnationalized not only because migrants and their significant others entertain ties across the borders of national states, staying in touch with family and friends, receiving or sending financial remittances in transnational social spaces. Also of importance are cross border recruitment schemes for workers and the cross border diffusion of norms appealed to in the case of migration, for example the social right to decent work as a human right. Moreover, migration can become an issue of inclusion or exclusion in fields important to life chances in the emigration transit or immigration states, a transnationalization of national states. And as in the nineteenth century, political conflicts arise constituting the social question as a public concern. In earlier periods, class differences dominated conflicts. While class has always been criss crossed by manifold heterogeneities, not least of all cultural ones around ethnicity, religion and language, it is these latter heterogeneities that have sharpened in situations of immigration and emigration over the past decades. Casting a wide net in terms of conceptual and empirical scope, this book tackles both the social structure and the politics of social inequalities. It sets a comprehensive agenda for research which also includes the public role of social scientists in dealing with the transnationalized social question.

The Rich Get Richer and the Poor Get Prison Jeffrey Reiman,Paul Leighton,2016-11-10 For nearly 40 years this classic text has taken the issue of economic inequality seriously and asked Why are our prisons filled with the poor Why aren't the tools of the criminal justice system being used to protect Americans from predatory business practices and to punish well off people who cause widespread harm The Rich Get Richer shows readers that much that goes on in the criminal justice system violates citizens sense of basic fairness It presents extensive evidence from mainstream data that the criminal justice system does not function in the way it says it does nor in the way that readers believe it should The authors develop a theoretical perspective from which readers might understand these failures and evaluate them morally and they do it in a short and relatively inexpensive text written in plain language New to this edition Presents recent data comparing the harms due to criminal activity with the harms of dangerous but not criminal corporate actions Presents new data on recent crime rate declines which are paired with data on how public safety is not prioritized by the U S government Updates statistics on crime victimization wealth and discrimination plus coverage of the increasing role of criminal justice fines and fees in generating revenue for government Updates on the costs to society of white collar crime Updates and deepened analysis of why fundamental reforms are not undertaken Streamlined and condensed prose for greater clarity

Development and Distribution Andy Sumner,2018-07-03 Since the Second World War surprisingly few developing countries have experienced a truly sustained episode of economic and social convergence towards the structural characteristics of the advanced nations East Asia has exceeded most regions in its achievement of convergence and much has been written on comparative industrialization and development in North East Asia Less discussed is South East Asia and the surprising and inclusive transformation several of its countries has undergone Development and Distribution focuses on South East Asia and more specifically on Malaysia Indonesia and Thailand These three nations have all undergone a major transformation in a way never anticipated from being poor agrarian countries to middle income countries with developed industrial and manufacturing bases How did Malaysia Indonesia and Thailand achieve such a transformation and how did they achieve the transformation with a form of economic growth that was driven by structural transformation but that was inclusive Given that historically it has been thought that structural transformation tends to push up inequality whilst inclusive growth necessitates static or even falling inequality this last point is particularly salient to developing countries Understanding how the transformation was possible in a relatively small space of time the extent to which it was inclusive and the caveats and prospects for South East Asia is thus an area of enquiry significant to all developing countries as they seek economic and

The Wealth of (Some) Nations Zak Cope, 2019-03-20 In this provocative new study Zak Cope makes the case that capitalism is empirically inseparable from imperialism historically and today Using a rigorous political economic framework he lays bare the vast ongoing transfer of wealth from the poorest to the richest countries through the mechanisms of monopoly rent unequal exchange and colonial tribute The result is a polarised international class structure with a relatively rich Global North and an impoverished exploited Global South Cope makes the controversial claim that it is because of these conditions that workers in rich countries benefit from higher incomes and welfare systems with public health education pensions and social security As a result the internationalism of populations in the Global North is weakened and transnational solidarity is compromised The only way forward Cope argues is through a renewed anti imperialist politics rooted in a firm commitment to a radical labour internationalism

Two Cheers for Higher Education

Steven Brint, 2019-01-08 A leading expert challenges the prevailing gloomy outlook on higher education with solid evidence of its successes Crushing student debt rapidly eroding state funding faculty embroiled in speech controversies a higher education market disrupted by online competition today's headlines suggest that universities power to advance knowledge and shape American society is rapidly declining But Steven Brint a renowned analyst of academic institutions has tracked numerous trends demonstrating their vitality After a recent period that witnessed soaring student enrollment and ample research funding universities he argues are in a better position than ever before Focusing on the years 1980-2015 Brint details the trajectory of American universities which was influenced by evolving standards of disciplinary professionalism market driven partnerships especially with scientific and technological innovators outside the academy and the goal of social inclusion Conflicts arose academic entrepreneurs for example flouted their campus responsibilities and departments faced backlash over the hiring of scholars with nontraditional research agendas Nevertheless educators' commitments to technological innovation and social diversity prevailed and created a new dynamism Brint documents these successes along with the challenges that result from rapid change Today knowledge driven industries generate almost half of U.S. GDP but divisions by educational level split the American political order Students flock increasingly to fields connected to the power centers of American life and steer away from the liberal arts And opportunities for economic mobility are expanding even as academic expectations decline In describing how universities can meet such challenges head on especially in improving classroom learning Brint offers not only a clear-eyed perspective on the current state of American higher education but also a pragmatically optimistic vision for the future
