[How Chinese Acquire and Improve Mathematics Knowledge for Teaching](#) Yeping Li, Rongjin Huang, 2018-05-16 While the importance of knowledge for effective instruction has long been acknowledged and the concept and structure of mathematics knowledge for teaching are far from being new, the process of such knowledge acquisition and improvement remains underexplored empirically and theoretically. The difficulty can well associate with the fact that different education systems embody different values for what mathematics teachers need to learn and how they can be assisted to develop their knowledge. To improve this situation with needed consideration about a system context and policies, *How Chinese Acquire and Improve Mathematics Knowledge for Teaching* takes a unique approach to present new research that views knowledge acquisition and improvement as part of teachers' life-long professional learning process in China. The book includes such chapters that can help readers to make possible connections of teachers' mathematical knowledge for teaching in China with educational policies and program structures for mathematics teacher education in that system context. *How Chinese Acquire and Improve Mathematics Knowledge for Teaching* brings invaluable inspirations and insights to

mathematics educators and teacher educators who wish to help teachers improve their knowledge and to researchers who study this important topic beyond a static knowledge conception      *Born to Fail?: Social Mobility: A Working Class View* Sonia Blandford, 2017-10-02 Sonia Blandford CEO of award winning charity Achievement for All writes brilliantly and honestly about the facing up to the realities of the white working class and how to address social mobility from the inside No one in the UK is better placed than Sonia to write about the struggles of white working class pupils in our schools She grew up on the Allied Estate in Hounslow and was the first member of her family to pursue education beyond the age of 14 and was also the first to attend university Sonia lost her mother when she took an accidental overdose when she couldn't read the doctor's prescription This tragic failing served as one of the inspirations for her to set up the award winning Achievement for All organisation who work with thousands of schools to help close the attainment gap Born to Fail tackles head on issues such as why education often doesn't matter to the working class how education has failed to deliver for them the importance of self belief action and confidence and how the Early Years is the crucial time to build success from the start      *Social Sciences and Interdisciplinary Behavior* Ford Lumban Gaol, Fonny Hutagalung, Nailya Bagautdinova, Lenar Safiullin, 2016-09-19 Social Sciences and Interdisciplinary Behavior contains papers that were originally presented at the 4th International Congress on Interdisciplinary Behavior and Social Science 2015 ICIBSoS 2015 held 22-23 October 2015 at The Institute of Management Economics and Finance of the Kazan Federal University Kazan Russia and 7-8 November 2015 in Arya Duta Hotel Jakarta Indonesia The contributions deal with various interdisciplinary research topics particularly in the fields of social sciences education economics and arts The papers focus especially on such topics as language cultural studies economics behavior studies political sciences media and communication psychology and human development      **Advances in Visual Informatics** Halimah Badioze Zaman, Alan F. Smeaton, Timothy K. Shih, Sergio Velastin, Tada Terutoshi, Nazlena Mohamad Ali, Mohammad Nazir Ahmad, 2019-11-12 This book constitutes the refereed proceedings of the 6th International Conference on Advances in Visual Informatics IVIC 2019 held in Bangi Malaysia in November 2019 The 65 papers presented were carefully reviewed and selected from 130 submissions The papers are organized into the following topics Visualization and Digital Innovation for Society 5.0 Engineering and Digital Innovation for Society 5.0 Cyber Security and Digital Innovation for Society 5.0 and Social Informatics and Application for Society 5.0      **Psychology and Mathematics Education** Gila Hanna, Laura Macchi, Karin Binder, Laura Martignon, Katharina Loibl, 2023-09-05 Modern Mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems Thus it is par excellence a model of rational inquiry Links between Cognitive Psychology and Mathematics Education have been particularly strong during the last decades Indeed the Enlightenment view of the rational human mind that reasons makes decisions and solves problems based on logic and probabilities was shaken during the second half of the twentieth century Cognitive psychologists discovered that humans thoughts and actions often deviate from rules imposed by strict normative

theories of inference Yet these deviations should not be called errors as Cognitive Psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved or biases that are caused by a lack of adaptation to abstract information formats Humans as the cognitive psychologist and economist Herbert Simon claimed do not usually optimize but rather satisfice even when solving problem This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program In Simon s bounded rationality and its direct descendant ecological rationality rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content free norms of coherence e g transitivity

**New Frontiers for College Education** Jim Gallacher, Fiona Reeve, 2018-08-06 The college sector is facing a growing number of new challenges caused by technological change globalisation and the growth of mass higher education New Frontiers for College Education considers the impact these changes have had and explores the developing role of college education in countries throughout the world Whilst analysing the issues associated with providing high quality vocational education and training the book also reflects on the role of colleges in widening access to both further and higher education Drawing together contributions from leading international academics policymakers and practitioners the book explores common themes across these diverse societies as well as some of the key challenges experienced within individual countries It considers the distinctive contributions that colleges can make in responding to these challenges through apprenticeships and other types of vocational education and training Contributors discuss the growing emphasis on creating more integrated systems of tertiary education recognising that colleges and universities are now expected to work more closely together and that these diverse demands can be difficult to reconcile Providing an authoritative and timely analysis of the changing role of colleges in contemporary society this book will be of great interest to academics researchers and postgraduate students in the areas of further and higher education vocational education and training lifelong learning and skills development It should also be essential reading for policymakers as well as practitioners working in colleges and other institutions of higher and further education

*Behaviour* Jack Maxwell Wood, Retha Wiesner, Rachel R. Morrison, Aharon Factor, Tui McKeown, 2024-10-28 The sixth Australasian edition of *Organisational Behaviour Core Concepts and Applications* stands as an exemplary resource tailored for one semester courses in Organisational Behaviour. With a deliberate focus on succinctness, relevance, and visual presentation, its fourteen chapters are meticulously crafted to captivate rather than inundate students. Throughout the text, a plethora of case studies and real-world instances delve into how organisations across the Australian, New Zealand, and Asian regions navigate pressing contemporary business concerns. These include the imperative of sustainable business practices, grappling with environmental impact and climate change, mitigating the gender pay gap, addressing employee stress, fostering resilience and work-life balance, adapting to the dynamics of millennials and an ageing workforce, enhancing employee retention strategies, and navigating the complexities of globalisation and outsourcing. Additionally, topics such as fostering diversity in the workplace, responding to workforce transformations precipitated by the COVID-19 pandemic, managing remote teams effectively, honing crisis management skills, and harnessing the potential of emerging technologies, particularly the ascendancy of generative artificial intelligence (AI), are comprehensively explored. This latest edition amplifies its focus on sustainability, entrepreneurial and adaptive leadership, and the pivotal role of technology in catalysing digital transformation within organisational contexts. Complemented by the latest research in the field, this text provides a thorough analysis of contemporary organisational behaviour.
