SECTION B

QUESTION 2

2.1 Read through the following abstract and answer the questions that follow.

U.N. food agency warns 140 million face hunger in Southern Africa
About 140 million people face hunger in Southern Africa because of a drought that has been exacerbated by an El Niño weather pattern (a warming of ocean surface temperatures) according to the United Nations World Food Programme (WFP). South Africa faces its worst drought in decades after 2015 was the driest calendar year since records began in 1964. Cape Town is at a dire state that means it could have to import up to 6 million tons of maize over half of its consumption needs. Maize prices in South Africa hit record highs. "One particular worrying symptom of Southern Africa's vulnerability to food and nutrition security is the alarming rate of chronic malnutrition."

Adapted from WFP/IFPRI and SADC News on December 12, January 2017

- 2.1.1 What is "El Niño"?
- 2.1.2 Describe how human activities could negatively influence climate that causes drought and how it influences food security.
- 2.1.3 South Africa is a semi-arid country. With the recent drought, a lot of strain was put on our water availability. Suggest THREE ways in which South Africans can increase the water availability in the future.
- 2.1.4 Use the information above and predict how South African consumers will be affected by the drought.
- 2.1.5 Write a short paragraph to highlight the main problem the world is facing as a result from the cartoon. Mention TWO ways in which it can probably be solved.
