Higher Education and Social Inequalities Richard Waller,Nicola Ingram,Michael Ward,2017-08-09 A university education has long been seen as the gateway to upward social mobility for individuals from lower socio economic backgrounds and as a way of reproducing social advantage for the better off With the number of young people from the very highest socio economic groups entering university in the UK having effectively been at saturation point for several decades the expansion witnessed in participation rates over the last few decades has largely been achieved by a modest broadening of the base of the undergraduate population in terms of both social class and ethnic diversity However a growing body of evidence exists in the continuation of unequal graduate outcomes This can be seen in terms of employment trajectories in the UK The issue of just who enjoys access to which university and the experiences and outcomes of graduates from different institutions remain central to questions of social justice notably higher education s contribution to social mobility and to the reproduction of social inequality This collection of contemporary original writings explores these issues in a range of specific contexts and through employing a range of theoretical and methodological approaches The relationship between higher education and social mobility has probably never been under closer scrutiny This volume will appeal to academics policy makers and commentators alike Higher Education and Social Inequalities is an important contribution to the public and academic debate

Credit Rating Governance Ahmed Naciri,2015-01-30 Credit rating agencies play an essential role in the modern

financial system and are relied on by creditors and investors on the market In the recent financial crisis their power and reliability were often questioned yet a simple rating downgrade could threaten to bankrupt a whole country This book examines the governance of credit rating agencies as expressed by their ability to fairly ethically and consistently assign higher rates to issuers having lesser default risks However factors such as the drive for increased revenue and market share the inadequate business model the inadequate methodology of assessing risk opacity and inadequate internal monitoring have all been identified as critical governance failures for credit agencies This book explores these issues and proposes some potential solutions and improvements This will be of interest to researchers and advanced students of corporate finance financial economics risk management investment management and banking

Global Human Resource

Development Thomas N. Garavan,Alma M. McCarthy,Michael J. Morley,2016-02-05 Drawing on contributions from leading academics in the field this volume within the Routledge Series in Human Resource Development specifically focuses on Global Human Resource Development HRD Specifically the volume provides an overview of 17 regions 85 countries and includes one emerging market grouping CIVETS This book examines the role of the state in HRD the relationship between HRD and the level of economic development in the country or region the influence of foreign direct investment within the country or region and firm level HRD practices within countries or regions Global Human Resource Development analyzes HRD from institutional and cross cultural perspectives making it possible for the first time to analyze trends across countries and regions and to draw conclusions about the value of institutional and cross cultural perspectives in the HRD context There is currently no book on the market that conceptualizes the discipline of global HRD in this way making this a definitive book on HRD across the globe of particular interest to researchers and reflective practitioners

Beyond the Welfare State Artur Ursanov,Eline Chivot,2015-03-19 The modern welfare state is under stress The Great Recession has had a severe impact on public finances in the Netherlands and in many other EU member states While the pace of fiscal consolidation remains a very controversial topic few would dispute the need to move public finances towards a more sustainable trajectory at some point in the future Given that social spending constitutes the largest share of public expenditure in the Netherlands it is inevitable that the questions about the affordability of existing welfare programs are being raised The modern welfare state is also affected by various long term structural changes in our society Population aging is creating additional demands on the pension health and long term care systems at the same time when governments are looking for ways to cut public spending Globalization makes capital and labor more mobile This makes raising fiscal revenue to pay for the social services and transfers more challenging Skill biased technical change destroys many medium and low skilled jobs and contributes to raising inequality Family patterns are changing as well bringing about new risks All these trends and challenges point to a clear bottom line the welfare state has to change King Willem Alexander in his Speech from the Throne in September 2013 essentially announced that the old welfare state is dead and has to be replaced with a participation society The new HCSS

report *Beyond the Welfare State* takes a broad look at the welfare state its historical evolution and its different types in various countries The report provides an in depth study of several economic and societal trends that create substantial challenges for the welfare state It also examines the efforts to reform various aspects of the welfare state that have been undertaken so far in a number of European countries Finally it outlines general approaches and principles that can serve as a basis for reforming the welfare state **Shadow Education and Social Inequalities in Japan** Steve R.

Entrich,2017-12-07 This book examines why Japan has one of the highest enrolment rates in cram schools and private tutoring worldwide It sheds light on the causes of this high dependence on shadow education and its implications for social inequalities The book provides a deep and extensive understanding of the role of this kind of education in Japan It shows new ways to theoretically and empirically address this issue and offers a comprehensive perspective on the impact of shadow education on social inequality formation that is based on reliable and convincing empirical analyses Contrary to earlier studies the book shows that shadow education does not inevitably result in increasing or persisting inequalities but also inherits the potential to let students overcome their status specific disadvantages and contributes to more opportunities in education Against the background of the continuous expansion and the convergence of shadow education systems across the globe the findings of this book call for similar works in other national contexts particularly Western societies without traditional large scale shadow education markets The book emphasizes the importance and urgency to deal with the modern excesses of educational expansion and education as an institution in which the shadow education industry has made itself seemingly indispensable *Handbook of Research on Employee Voice* Adrian Wilkinson,Jimmy Donaghey,Tony

Hidden Potential Maurizio Bussolo,Siddharth Sharma,2023-01-24 Informality remains widespread in South Asia despite decades of economic growth The low earnings and high vulnerability in the informal sector make this a major development issue for the region Yet there is no consensus on its causes and consequences with the debate polarized between a view that informality is a problem of regulatory evasion and should be eradicated and another that equates informality with economic exclusion Recent advances in analyzing informality as the outcome of firm dynamics in distorted economic

environments can help reconcile them Building on these advances the approach adopted in this volume clarifies that there are different types of informality with different drivers and consequences The report has four main messages that underscore the need for a multipronged strategy First informality in South Asia is dominated by firms that happen to be outside the purview of regulations because they are small as opposed to those that remain small to escape regulations Second reforms of business regulations tend to have small direct effects on the informal sector although they could have sizable indirect impacts on it if they succeed in removing major inefficiencies in the broader economy Third e-commerce platforms offer new opportunities to informal firms and workers but many of them lack complementary skills or credit to benefit from such technologies Fourth a combination of contributory and non-contributory programs recognizing the heterogeneous saving capacities of informal workers may be necessary to achieve more universal coverage of social insurance

The Art of Collectivity Jennifer Beth Spiegel, Benjamin Ortiz Choukroun, 2019-09-12 Amidst epidemics of youth alienation and cultural polarization community-based artistic practices are sprouting up around the world as antidotes to policies of austerity and social exclusion Rejecting the radical individualism of the neoliberal era many artistic projects promote collectivity and togetherness in navigating challenges and constructing shared futures The Art of Collectivity is about how one such creative social program deployed this approach in service of a post-neoliberal vision Focusing on a national social circus initiative launched by a newly elected Ecuadorean government to help actualize its citizens' revolution the book explores the intersection between global cultural politics participatory arts collective health and social transformation The authors include scholars and practitioners of community arts humanities social sciences and health sciences from the Global North and Global South Sensitive to hierarchical binaries such as research practice north-south and art-science they work together to provide a multifaceted analysis of the way cultural politics shape policy pedagogy and aesthetic sensibilities as well as their socio-cultural and health-related effects The largest study of social circus to date combining detailed quantitative qualitative and arts-based research The Art of Collectivity is a timely contribution to the study of cultural policies critical pedagogies collective art-making and community development

Sick Schools David V. Anderson, 2020-01-10 Who's afraid of for-profit education Those who work in non-profit or government-owned and operated schools Many parents and other stakeholders have been made fearful by this education establishment What's more important to humans: nutrition or education Nutrition is more important because it is the prerequisite for other human activities including education What organizations provide food and who pays for the food Food is provided by for-profit farmers for-profit processors for-profit wholesalers and for-profit retailers Most food is purchased with the consumer's own money but a significant amount is purchased by low-income individuals using food stamps Why can't education be provided similarly using education stamps We trust for-profit enterprises to provide our food Why can't we trust for-profit enterprises to provide K-12 education Fear-mongers have frightened us and made us into gullible compliant socialists who despise commercial activities in education Go to the supermarket and ponder

its marvelous array of foods and then contemplate how a for profit K 12 education sector would please and amaze its customers

Improving a Country's Education Nuno Crato, 2020-11-23 This open access book compares and contrasts the results of international student assessments in ten countries The OECD's Programme for International Student Assessment PISA released the results of its 2018 assessment in December 2019 This book reflects the debates that typically follow the release of these results and focuses on the causes of differences between countries Such causes include continuous decline in one country improvement combined with increasing internal inequalities in another country or rapid improvement in spite of an outdated curriculum in yet another In addition the book discusses a number of general questions Is knowledge outdated Are computers taking over and replacing teachers Are schools killing creativity Are we adequately preparing the next generation Are schools failing to educate our kids The book starts out with a summary of PISA's evolution and PISA results and an explanation of the major factors that play a role in changes in countries results The next ten chapters are devoted to ten specific countries offering a summary of data and an explanation of the major drives for changes in education results for each one Each chapter includes a short description of the country's educational system as well as the impact of PISA and other ILSA studies on the country's educational policies The chapters also include a timeline of policy measures and main hallmarks of the country's educational evolution discussing the impact of these measures on its PISA results A final reference chapter explains what PISA is what it measures and how While highlighting the 2018 results the book also takes into consideration previous results as well as long term initiatives This book gathers the contribution of well known and respected experts in the field Specialists such as Eric Hanushek for the US Tim Oates for England Montse Gomendio for Spain Gunda Tire for Estonia and all other contributors draw on their vast experience and statistical analysis expertise to draw a set of rich country lessons and recommendations that are invaluable for all of those who care about improving a country's education system
