

## JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

Colette Chabbott,2014-11-15 Health for All and Education for All have been rallying cries for a host of international development activities for more than a quarter century Where did these global goals come from Why have the health goals seemingly advanced so much faster than those in education In this book author Colette Chabbott explores the foundational role that international development organizations and the innovations they champion have played in shaping and advancing such goals Chabbott demonstrates the importance of science and measurement in rendering some innovations more universal and compelling than others Her analysis includes in depth case studies of innovations developed at the grassroots and scaled up at the national and international levels by the International Center for Diarrheal Disease Research and by BRAC once a Bangladeshi now a major international NGO These studies all suggest that greater investment in new types of education research based in the Third World but with strong ties to research centers of international scope in the First World are likely the prerequisites for achieving better cheaper faster universal education This important book will provoke scholars students and international development practitioners to think more deeply about the cultural and scientific underpinnings of

education and international development The authors careful analyses are particularly needed as the international community defines new global goals for the post 2015 era
