South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Learning with Damaged Colonial Places Theresa Magdalen Giorza, 2021-05-10 This book offers a close and detailed account of the emergent and creative pedagogies of children learning together in a small not for profit preschool and the entangled becomings of their carers as well as the researcher artist author The mutually affecting and inseparable realities of the material and the discursive are made visible through lively and sensual pedagogical invention by a group of five year olds in the inner city preschool which is located in Johannesburg South Africa These small local stories are recognized in their emergence with global geopolitical realities The author makes a valuable contribution to post qualitative research through the use of visual

research methods and non representational approaches to working with knowledge The book draws on the constantly evolving practices of Philosophy for Children P4C and Reggio Emilia both as pedagogical tools and as research methods Photographs and stills from video footage provide a sense of the relatively modest material environment of the school The book celebrates the considerable richness of the involvement of the children and the enormous possibilities offered by the world both inside and outside of the classroom when an enquiry led art based pedagogy is followed Drawings and other products created by the children in the study offer valuable insight into the depth and complexity of their engagement with their worlds both individual and collaborative
