Catastrophes Dueep Jyot Singh, John Davidson, 2017-03-04 Table of Contents Introduction Survival of the Fittest The Right to Bear Arms First Priority Water Water Filtration Methods Storing or Hoarding Food Your Neighborhood Security Watch Group Leadership for Survival Possible Factors for Potential Catastrophe Survival Outside Trapping Hunting and Fishing Extra Emergency Items in Your Kit Making a crochet hook Conclusion Author Bio Publisher Introduction Canning and preserving your own food means that you are going to have an adequate stock of food in case of famine Also nobody can accuse you of hoarding food in an emergency which according to them should be distributed to everybody else who did not do any canning or preserving This book is not for the faint hearted It is not like other books on survival with just a number of tips and techniques because it has real life situations and episodes based on experience and circumstances These include war riots genocides and other man made catastrophes which the author has experienced during her lifetime or which has been recounted to her by her family members during their lifetimes Unfortunately all over the world there is absolutely no generation which can say that it has not faced war catastrophes or other natural and man made disasters That is why even though this book may have a number of episodes which may look really horrible especially to people who have never faced any drastic catastrophe but one has to face reality and be ready for the worst You may also say that these things happen in your continent or country it cannot happen in my country because we are civilized have a strong law and order system and so on But remember that during catastrophes nothing is normal and that is when human beings and their true natures come to the forefront and a survival of the fittest and a fight to live and the need to preserve and protect This is the first natural instinct of human beings and it cannot disappear through a thin polish of civilization One sunny evening I asked a number of my friends during a casual weekend get together in America whether they knew anything about surviving in famine conditions or any other disaster conditions Their immediate response was that this was not possible in America due to its state of the art disaster management technology and latest knowledge on how to deal with disasters in any form Also according to them thanks to the large amounts of food being produced by their farmers there was absolutely no chance of famines or droughts and the only disaster against which they could survive was natural catastrophes This was 20 years ago and I could say that at that time the outlook was rather positive for mankind to survive for another couple of millennia Unfortunately with the coming of more natural disasters every year and even man made catastrophes like war the chances of one suffering from a famine is getting to be larger every year I am not a pessimistic soothsayer I am just being practical Look around you Remember the social political economical and financial condition of the world around you of say 25 years ago and compare it with the same factors today You are going to be surprised at the number of catastrophic disasters wars political upheavals and other factors which are detrimental to the human condition and its steady rise every year So there is absolutely no basis for you putting your head under your safety blanket and curling up in a corner and singing no no this cannot happen to us because we are invulnerable invincible survivors and the government is going to protect us
