The Time of Global Politics Christopher McIntosh,2023-12-07

How can we better relate and respond to the political times we inhabit? Temporal relationships play a central role in the questions at the heart of global politics, but political commentators and observers focus almost exclusively on the past as a means of predicting and preparing for the future. Christopher McIntosh argues that although past events are meaningful for our collective future, the present remains vitally important. McIntosh emphasises the importance of the present as a conceptual resource and analytical category for thinking about international politics. The present, he suggests, places an orientation toward difference and a recognition of the human limits of understanding.
