International General Certificate of Secondary Education

MARK SCHEME for the May/June 2013 series

0653 COMBINED SCIENCE

0653/22

Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

not just economically but politically and socially as well of President Eisenhower's modern interstate highway system in America. With that system and the infrastructure that supports it now in a state of decline and decay, what is the best path for the future at a time of enormous fiscal constraints? Should California politicians plunge ahead with plans for a high speed rail that every expert says despite the allure will go largely unused and will never pay back the massive investment while at this very moment potholes go unfilled all across the state? What path is best for emerging countries to keep pace with dramatic economic growth for their part? What are the social and financial costs of gridlock in our cities? Features Approximately 675 signed articles authored by prominent scholars are arranged in A to Z fashion and conclude with Further Readings and cross references. A Chronology helps readers put individual events into historical context, a Reader's Guide organizes entries by broad topical or thematic areas, a detailed index helps users quickly locate entries of most immediate interest, and a Resource Guide provides a list of journals, books, and associations and their websites. While articles were written to avoid jargon as much as possible, a Glossary provides quick definitions of technical terms. To ensure full well rounded coverage of the field, the General Editor with expertise in urban planning, public policy, and the environment worked alongside a Consulting Editor with a background in Civil Engineering. The index, Reader's Guide, and cross references combine for thorough search and browse capabilities in the electronic edition. Available in both print and electronic formats, *Encyclopedia of Transportation* is an ideal reference for libraries and those who want to explore the issues that surround transportation in the United States and around the world.

The aim of **The People's Money** Paola Subacchi, 2016-11-22 Many of the world's major economies boast dominant international currencies. Not so for China. Its renminbi has lagged far behind the pound, the euro, and the dollar in global circulation, and for good reason. China has long privileged economic policies that have fueled development at the expense of the renminbi's growth, and it has become clear that the underpowered currency is threatening China's future. The nation's leaders now face the daunting task of strengthening the currency without losing control of the nation's economy or risking total collapse. How are they approaching this challenge? In *The People's Money*, Paola Subacchi introduces readers to China's monetary system, mapping its evolution over the past century and particularly its transformation since Deng Xiaoping took power in 1978. Subacchi revisits the policies that fostered the country's economic rise while at the same time purposefully creating a currency of little use beyond China's borders. She shows the key to understanding China's economic predicament lies in past and future strategies for the renminbi. The financial turbulence following the global crisis of 2008 coupled with

China's ambitions as a global creditor and chief economic power has forced the nation to reckon with the limited international circulation of the renminbi. Increasing the currency's reach will play a major role in securing China's future.

Towards Low Carbon Cities in China Sun Sheng Han, Ray Green, Mark Wang, 2014-09-19 This book explores the relationship between urban form and greenhouse gas emissions in China providing new insights for policy urban planning and management. Drawing on the results of a four year multidisciplinary research project the book examines how factors such as urban households access to services and jobs land use mixes and provision of public transport impact on greenhouse gas emissions. The authors analyse data from a wide range of sources including 4677 sample households from four major Chinese cities Beijing Shanghai Wuhan and Xi'an with diverse locations urban spatial structures and population sizes. The book explores residents' attitudes to reducing GHG emissions and advances knowledge relating to three environmental scales: cross metropolitan, intra city and neighbourhood level. It also contributes to debates on low carbon policy by revealing the relevance of urban planning parameters at both the macro and micro levels. The book will be of interest to scholars in the areas of urban planning urban management environmental sustainability and resource utilisation as well as urban policy makers and planners who are working toward developing low carbon sustainable cities of the future. *Free Speech after 9/11* Katharine Gelber, 2016-04-14 Although there has been a lot written about how counter terrorism laws impact on human rights and civil liberties most of this work has focussed on the most obvious or egregious kinds of human rights abrogation such as extended detention torture and extraordinary rendition. Far less has been written about the complex ways in which Western governments have placed new and far reaching limitations on freedom of speech in this context since 9/11. This book compares three liberal democracies the United States the United Kingdom and Australia in particular showing the commonalities and similarities in what has occurred in each country and the changes in the appropriate parameters of freedom of speech in the counter terrorism context since 9/11 achieved both in policy change and the justification for that change. In all three countries much speech has been criminalized in ways that were considered anachronistic or inappropriate in comparable policy areas prior to 9/11. This is particularly interesting because other works have suggested that the United States' unique protection of freedom of speech in the First Amendment has prevented speech being limited in that country in ways that have been pursued in others. This book shows that this kind of argument misses the detail of the policy change that has occurred and privileges a textual reading over a more comprehensive policy based understanding of the changes that have occurred. The author argues that we are now living a new normal for freedom of speech within which restrictions on speech that once would have been considered aberrant overreaching and impermissible are now considered ordinary necessary and justified as long as they occur in the counter terrorism context. This change is persistent and it has far reaching implications for the future of this foundational freedom. Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking (OSM) in public examinations. Given that Hong

Kong leads the way in OSM innovation this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong The authors discuss their experience of the validation process demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders **Regulatory Support for Off-Grid Renewable**

Electricity Ngozi Chinwa Ole, Eduardo G. Pereira, Peter Kayode Oniemola, Gustavo Kaercher Loureiro, 2023-02-02 This book investigates the role of law in enabling and addressing the barriers to the development of off grid renewable electricity OGRE The limited development of OGRE is ascribed to a host of social economic and legal barriers including the problem of initial capital costs existing subsidies for conventional electricity and lack of technological and institutional capacity Through the analyses of selected case studies from Africa Asia Europe and North and South America this book discusses the typical barriers to the development of OGRE from a global perspective and examines the role of the law in addressing them Drawing together the lessons learnt from the case studies this book offers robust recommendations on how the development of OGRE will support the goal of achieving universal access to low carbon reliable and sustainable electricity globally This volume will be of great interest to students scholars policy makers investors and practitioners in the fields of energy law and policy climate change and renewable energy development Research Anthology on Recent Trends, Tools, and Implications of

Renewables Michael Aklin,Johannes Urpelainen,2018-03-23 A comprehensive political analysis of the rapid growth in renewable wind and solar power mapping an energy transition through theory case studies and policy Wind and solar are the most dynamic components of the global power sector How did this happen After the 1973 oil crisis the limitations of an energy system based on fossil fuels created an urgent need to

experiment with alternatives and some pioneering governments reaped political gains by investing heavily in alternative energy such as wind or solar power. Public policy enabled growth over time and economies of scale brought down costs dramatically. In this book Michael Aklin and Johannes Urpelainen offer a comprehensive political analysis of the rapid growth in renewable wind and solar power, mapping an energy transition through theory, case studies, and policy analysis. Aklin and Urpelainen argue that because the fossil fuel energy system and political support for it are so entrenched, only an external shock, an abrupt rise in oil prices or a nuclear power accident, for example, allows renewable energy to grow. They analyze the key factors that enable renewable energy to withstand political backlash, and they draw on this analysis to explain and predict the development of renewable energy in different countries over time. They examine the pioneering efforts in the United States, Germany, and Denmark after the 1973 oil crisis, and other shocks explain why the United States surrendered its leadership role in renewable energy and trace the recent rapid growth of modern renewables in electricity generation, describing among other things the return of wind and solar to the United States. Finally, they apply the lessons of their analysis to contemporary energy policy issues.

India's Rise as an Asian Power A. D. D. Gordon, 2014-08-05 India's Rise as an Asian Power examines India's rise to power and the obstacles it faces in the context of domestic governance and security relationships and security issues with its South Asian neighbors and international relations in the wider Asian region. Instead of a straight line projection based on traditional measures of power such as population size, economic growth rates, and military spending, Sandy Gordon's nuanced view of India's rise focuses on the need of any rising power to develop the means to deal with challenges in its domestic neighborhood, South Asia, and regional continental spheres. Terrorism, insurgency, border disputes, and water conflict and shortages are examples of some of India's domestic and regional challenges. Gordon argues that before it can assume the mantle of a genuine Asian power or world power, India must improve its governance and security; otherwise, its economic growth and human development will continue to be hindered, and its vulnerabilities may be exploited by competitors in its South Asian neighborhood or the wider region. This book will appeal to students and scholars of India and South Asia, security studies, foreign policy, and comparative politics, as well as country and regional specialists.

Potential Exports and Nontariff Barriers to Trade Asian Development Bank, 2020-01-01 This publication explores how India could boost its exports by addressing nontariff trade barriers. It focuses on sanitary and phytosanitary measures and technical barriers to trade and on export products that have the potential to increase their market share in Bangladesh, Bhutan, Maldives, Nepal, and Sri Lanka. It considers options including legal reforms, the upgrade of quality standards, and laboratory equipment and institution building of accrediting bodies and conformity assessment bodies. Practical recommendations suggest ways forward for both the public and private sectors.

The End of Stationarity Mark Schapiro, 2016-05-17 Scientists have devised a new term to explain the turmoil caused by climate change: the end of stationarity. It means that our baselines for rainfall, water flow, temperature, and extreme weather are no longer

relevant that making predictions based on past experience is no longer possible But climate change has upended baselines in the financial world too disrupting the global economy in ways that are just becoming clear leaving us unable to assess risk and causing us to fundamentally re think economic priorities and existing business models At the heart of that financial unrest is the role of carbon and as the world moves toward making more and more polluters pay to emit it a financial mystery unfolds What are the costs Who has the responsibility to pay for them Who do you pay How do you pay And how will those costs ripple through the economy These are the questions veteran journalist Mark Schapiro attempts to answer as he illuminates the struggle to pinpoint carbon s true costs and allocate them fairly all while bumping up against the vagaries of the free market the lobbying power of corporations the political maneuverings of countries and the tolerance of everyday consumers buying a cup of coffee a tank of gas or an airplane ticket Along the way Schapiro tracks the cost of carbon through the drought ridden farmland of California the jungles of Brazil the world s greatest manufacturing center in China the carbon trading center of Europe and the high tech crime world that carbon markets have inspired He even tracks the cost of carbon through the skies themselves where efforts to put a price tag on the carbon left by airplanes in the no man s land of the atmosphere created what amounted to a quiet but powerful global trade war The End of Stationarity deftly depicts the wild new carbon economy and shows us how nations emerging and developed teeter on its brink Originally published in hardcover as Carbon Shock the book is updated throughout and includes a new afterword based on the Paris climate talks
