Regulatory Problems and Disorders in Early Childhood: Aetiology, Contextual Factors, Developmental Outcomes and Pathways, and Treatment Options Anna Katharina Georg, Ayten Bilgin, Julia Jaekel,2025-01-08 Regulatory problems defined as excessive crying sleeping or feeding problems are among the most common concerns of parents with children 0 5 years old These problems are typically understood within the context of the parent child relationship however the complex underlying mechanisms that explain the occurrence and continuation as well as long term outcomes of regulatory problems are still poorly understood Despite some promising treatment options important knowledge gaps remain to be addressed which will inform evidence based practice for services of children aged 0 5 With this Research Topic we aim to bring together research from different countries and from multidisciplinary research backgrounds on the topic of regulatory problems and disorders We particularly encourage research that focuses on observed parent child interactions in relation to regulatory problems We view regulatory problems as a transdiagnostic biopsychosocial concept covering excessive crying sleeping and or feeding and eating problems However studies with a focus on any of these problems are also encouraged

Inherited Metabolic Epilepsies Phillip L. Pearl,2012-10-04 The explosion of information in neurogenetics and metabolism mandates increasing awareness of appropriate diagnostic and therapeutic strategies in the setting of certain epilepsies especially those of very early onset There are over 200 inherited disorders that are associated with seizures and prompt identification and intervention is crucial for a positive outcome This text brings together the leading authorities working in this area to present state of the art clinical reviews covering the science recognition and treatment of the inherited metabolic epilepsies and related disorders The book begins with general principles for diagnosis and targeted intervention including screening protocols laboratory testing seizure patterns and EEG findings imaging new technologies and the ketogenic diet The next two sections are devoted to the cohort of specific small molecule and large molecule disorders that are treatable yet can be so vexing to clinicians and investigators The book

concludes with a clinical algorithm designed to be a resource for the physician in search of direction while considering an inherited metabolic disorder as the explanation for a patient with epilepsy
