Borman,Matthew Boulay,2004-04-26 This book brings together up to date research based evidence concerning summer

learning and provides descriptions and analyses of a range of summer school programs The chapters present theory and data that explain both the phenomenon of summer learning loss and the potential for effective summer programs to mitigate loss and increase student achievement Summer Learning Research Policies and Programs presents evidence describing variations in summer learning loss and how these learning differences affect equality of educational opportunity and outcomes in the United States discusses the development characteristics and effects of the most recent wave of summer programs which are designed to play key roles in the recent standards movement and related efforts to end social promotion examines the impact of three of the most widespread replicable summer school programs serving students across the United States and considers the characteristics and effects of alternative programs and practices that are designed to combat the problem of summer learning loss head on Intended for education researchers practitioners policymakers and graduate students this volume is particularly relevant to those interested in social stratification equity minded policies implications of the current standards movement and high stakes testing and the development of programs and practices for improving education Augmented Intelligence and Intelligent Tutoring Systems Claude Frasson, Phivos Mylonas, Christos

Troussas, 2023-05-21 This book constitutes the refereed proceedings of the 19th International Conference on Augmented Intelligence and Intelligent Tutoring Systems ITS 2023 held in Corfu Greece during June 2 5 2023 The 41 full papers and 19 short papers presented in this book were carefully reviewed and selected from 84 submissions The papers are divided into the following topical sections augmented intelligence in tutoring systems augmented intelligence in healthcare informatics augmented intelligence in games serious games and virtual reality neural networks and data mining augmented intelligence and metaverse security privacy and ethics in augmented intelligence and applied natural language processing *Charting Reform, Achieving Equity in a Diverse Nation* Gail L. Sunderman, 2013-05-01 This book examines what equity means in a nation where the schools are becoming more diverse The authors consider how well our educational reform policies often framed in the language of equity and opportunity measure up to the challenges of achieving equity in a diverse nation While there is growing awareness of the increasing racial ethnic and socioeconomic diversity of the nation there is little recognition of how these trends affect the schools particularly in formerly homogeneous communities At the same time inequalities in student achievement between different racial ethnic and socioeconomic groups persist even as educational policy has intensified the focus on the achievement gap These two challenges make definitions of equity and opportunity as urban problems obsolete and call for a critical examination of educational policy and reform from an equity perspective Central themes include the critical examination of how equity is conceived under the law and in policy the experiences of minority students in suburban schools and the impact of current reform policies and strategies for achieving greater educational opportunities for all students This book is designed for graduate and undergraduate courses in educational policy and policy analysis for policymakers interested in a critical examination of current reform policies and options and educational leaders

and administrators struggling with the implementation of reform mandates From a policy perspective it includes a survey of the evolution of educational policies and reforms since the 1960s and traces the mix of legal and legislative legacies that have informed educational policy and equity It describes how trends in suburban diversification affect the schools something that has largely escaped the attention of educational reformers It provides school based and non school based remedies for achieving equity in diversifying suburban communities and articulates alternatives to the current accountability for performance approach It offers new and innovative analyses of current approaches to school reform including an analysis of how accountability tests can create the illusion of reducing the achievement gap and an examination of the paradoxes of federally funded compensatory policies that incorporate market based strategies Novel approaches such as social emotional learning and placed based college access strategies are examined through an equity lens
