Wilson, 2017-05-15 Crew Resource Management CRM training was first introduced in the late 1970s as a means to combating an increased number of accidents in which poor teamwork in the cockpit was a significant contributing factor Since then CRM training has expanded beyond the cockpit for example to cabin crews maintenance crews health care teams nuclear power teams and offshore oil teams Not only has CRM expanded across communities it has also drawn from a host of theories from multiple disciplines and evolved through a number of generations Furthermore a host of methodologies and tools have been developed that have allowed the community to better study and measure its effect on team performance and ultimately safety Lacking however is a forum in which researchers and practitioners alike can turn to in order to understand where CRM has come from and where it is going This volume part of the Critical Essays on Human Factors in Aviation series proposes to do just that by providing a selection of readings which depicts the past present and future of CRM research and training

Summary of Nick Van Dam's The E-Learning Fieldbook Everest Media, 2022-03-01T21:00:00Z Please note This is a companion version not the original book Sample Book Insights 1 In 1996 the first article on Internet based training was published in Training Magazine That year the e learning market grew from a few million dollars to 3 4 billion worldwide But in 2002 the stock market crashed and the e learning industry experienced a trough of disillusionment 2 The last event in the time flow is the merger in the e learning industry between SmartForce and SkillSoft in 2002 This merger created the largest global e learning vendor and it is viewed by CLO magazine as the beginning of the trend toward Enlightenment and Productivity 3 Today e learning has proved itself to be a credible opportunity and approach to learning though it has been hurt by some less than stellar implementations Many believe that there is no doubt about the importance of applying e learning when and where it adds value 4 E learning has proven to have a significant business impact as you will find in Chapter 2 of this Fieldbook Many organizations have successfully implemented e learning initiatives that were well aligned with specific business goals *Developing a Security Training Program* Joseph McDonald, 2024-07-22 Developing a Security Training Program focuses on how to establish a comprehensive training program for a security department from the ground up This book highlights formal curriculum development consistent and continual training and the organizational benefits including how such security training will be a value add It s long overdue for the industry to revisit old security training models from the past to both general staff as well as to the dedicated security staff and professionals within organizations and examine and revamp such with a fresh perspective Given the current dynamic environment for businesses and the threats businesses face it is important that any such training consider all procedures and policies and be fully integrated into

the company culture This includes maintaining an eye on budgetary and financial costs while recognizing the need to budget for more training resources to maintain resilience and adaptability to current challenges and future changes to the environment There is only one way to prepare your staff and that is through comprehensive and consistent training Developing a Security Training Program provides the blueprint and tools for professionals to provide ongoing targeted and comprehensive security training at a low budget friendly cost
