Rethinking the Teaching Mathematics for Emergent Bilinguals Ji Yeong I, Hyewon Chang, Ji-Won Son, 2019-11-09

This book focuses on the role of cultural background in Korean public schools and provides essential insights into how Korean teachers perceive and respond to the transition of their classroom situations with Korean language learners. It reveals the perspectives and the practices of Korean teachers especially with regard to multicultural students who struggle with language barriers when learning mathematics. The information provided is both relevant and topical as teaching mathematics to linguistically and culturally diverse learners is increasingly becoming a worldwide challenge.

Policy, Practice, and Readiness to Teach Primary and Secondary Mathematics in 17 Countries Maria Teresa Tatto, John Schwille, Sharon L. Senk, 2012. TEDS M represents the first large scale international comparative study of the preparation of primary and lower secondary specifically mathematics teachers. IEA considers TEDS M a landmark study in terms of its examination within both national and international contexts of country level policies relating to the preparation of future teachers of mathematics. The authors of this report look closely at how these policies are played out in the participating countries, varied teacher education programs and instructional practices and speculate on the implications of these programs and practices for student learning in schools. They also suggest how TEDS M might contribute to ongoing research into teacher education.

The Important Role of Institutional Data in the Development of Academic Programming in Higher Education Sydney Freeman, Jr., Crystal Renée Chambers, Beverly Rae King, 2016-06-17. Institutional data is one of the important aspects that informs the development and sustainability of academic programming within the academy. Centrality of institutional data is key when making decisions related to a range of academic programs. This volume addresses with both depth and breadth various types of academic programming i.e. academic degrees, research centers, institutes, diverse institutional types including community colleges, doctoral research universities, minority serving and for-profit institutions and concrete examples and steps regarding how to utilize institutional data to improve academic planning and development.
