After having observed molecular models which show 3D shape comparisons were discussed. After creating particle level models for binary compounds charged ions, bond length, weight, mass, molar, particle level, bond for binary compounds structural level (particle level). Additionally, various chemical bonds modelled molecular particle level, after understanding the three-dimensional shape of each molecule effects for the and particle level. After understanding the particle level model that the various chemical elements considered to provide the differences that changes of the bond length values.

1. After the chemical model shows the particle structure that shows comparison. The same and ions structure comparison is given.
