

Chemistry – Unit 6 Worksheet 1

We have observed evidence that atoms of different elements are different, the most noticeable being their predictable characteristic chemical behaviour. Atoms of one element react in a predictable way with atoms of another element. However, when the elements react, sometimes several particles are combined to form compounds. They do not combine individually as atoms. We will now examine the patterns that lead to the ratios in which atoms combine to produce compounds in order to describe the changes of the basic building blocks.

1. Write the formula and draw the particle diagram for each compound. The ratio of atoms in each compound is given.

Atomic formula ratio	12 hydrogen 16 oxygen	12 hydrogen 16 oxygen	12 hydrogen 16 oxygen	1 hydrogen 1 oxygen
