Higher Education, 2010 **Stochastic Integral And Differential Equations In Mathematical Modelling** Santanu Saha Ray, 2023-04-25 The modelling of systems by differential equations usually requires that the parameters involved be completely known Such models often originate from problems in physics or economics where we have insufficient information on parameter values One important class of stochastic mathematical models is stochastic partial differential equations SPDEs which can be seen as deterministic partial differential equations PDEs with finite or infinite dimensional stochastic processes either with colour noise or white noise Though white noise is a purely mathematical construction it can be a good model for rapid random fluctuations Stochastic Integral and Differential Equations in Mathematical Modelling

concerns the analysis of discrete time approximations for stochastic differential equations SDEs driven by Wiener processes It also provides a theoretical basis for working with SDEs and stochastic processes This book is written in a simple and clear mathematical logical language with basic definitions and theorems on stochastic calculus provided from the outset Each chapter contains illustrated examples via figures and tables The reader can also construct new wavelets by using the procedure presented in the book Stochastic Integral and Differential Equations in Mathematical Modelling fulfils the existing gap in the literature for a comprehensive account of this subject area *Recent Trends in Ergodic Theory and Dynamical Systems* Siddhartha Bhattacharya, Tarun Das, Anish Ghosh, Riddhi Shah, 2015-01-26 This volume contains the proceedings of the International Conference on Recent Trends in Ergodic Theory and Dynamical Systems in honor of S G Dani's 65th Birthday held December 26-29 2012 in Vadodara India This volume covers many topics of ergodic theory dynamical systems number theory and probability measures on groups Included are papers on Teichmüller dynamics Diophantine approximation iterated function systems random walks and algebraic dynamical systems as well as two surveys on the work of S G Dani
