with Think Alouds Molly Ness, 2017-07-13 I'm guessing that those two are planning a surprise. The author keeps mentioning the storm because she wants us to think that the character's upset. Wait, yikes! I gotta go back and reread because I'm not getting this part. These are the flickering thoughts of a strategic reader. If only we could bottle all these mental moves and pour them into the minds of our students, then readers' achievement would grow exponentially. In *Think Big With Think Alouds*, Molly Ness delivers a process that comes close to bottling that magic. Molly spent a year researching teachers' think alouds and she uses these findings to help you know just what to do. The big time saver: You focus on just these five strategies: asking questions, making inferences, synthesizing understanding, the author's purpose, and monitoring and clarifying. Select the one or two strategies that align to your text and get ready with a stack of sticky notes. Grab a pencil and you are on your way to dynamic lessons using Molly's three-step planning process: Read Once (Go wild putting a flurry of sticky notes on spots that strike you), Read Twice (Whittle your notes down to the juiciest stopping points), Read Three Times (Jot down what you will say so there's no need to wing it in front of the kids). Other practical tools include more than 20 ready-made think aloud scripts for favorite texts by Sandra Cisneros, Seymour Simon, Shel Silverstein, and many others to use for think alouds for fiction, informational text, and poetry. Fun small group and partner activities to gradually transfer comprehension strategies to your students. Downloads on the companion website including spinner and dice templates, planning forms, and think aloud scripts. Molly Ness is an associate professor at Fordham University's Graduate School of Education. She graduated Phi Beta Kappa from Johns Hopkins University and earned her PhD in reading education from the University of Virginia. A former Teach For America corps member, she is an experienced classroom teacher and reading clinician. Her numerous books and articles focus on reading comprehension, the instructional decisions of teachers, and the assessment and diagnosis of struggling readers.

Children and Companion Animals: Psychosocial, Medical, and Neurobiological Implications Andrea M. Beetz, Lynette A. Hart, Brinda I. Jegatheesan, Naoko Koda, 2018-08-16 Children and companion animals seem to have a natural affinity towards each other. Most children desire a relationship with their own companion animals or at least demonstrate an interest to interact with animals in general. Living with companion animals or interacting with animals may have psychosocial, neurobiological, or medically relevant effects on typically developing children and juveniles as well as those with diverse and special needs. In this eBook we present several articles addressing the relationships between children, juveniles, and animals in different countries including Austria, Germany, Jamaica, Japan, the United Kingdom, and the United States. Three articles discuss approaches in animal-assisted education including animal keeping and animal-assisted interventions in schools and an experimental study investigating immediate effects of dogs on reading competence and accompanying stress reactions with cortisol and behavior. Other articles address topics involving children and their companion animals including dog walking by children and juveniles, risks of dog bites by the family dog, selection of pet dogs for families with a child with autism spectrum disorder (ASD), and the relationships that children with ASD have with their family cats. The interactions

between children juveniles and animals addressed in this eBook provide new insights into some scarcely investigated themes and underline the significance of animals in children s lives **Educating Gifted Students in Middle School** Susan Rakow,2021-09-30 Educating Gifted Students in Middle School A Practical Guide 3rd ed helps educators with the challenging task of understanding and meeting the needs of gifted students in middle school This revised and updated third edition Provides a rationale and framework that middle schools can use to fill the service gap for gifted and advanced learners Addresses the needs of learners from diverse backgrounds Shows how to implement effective program models Identifies best practices for the classroom Shares research based curriculum models Topics addressed include school organization instructional strategies in the basic subject areas cocurricular and summer programs the missing link of executive function skills and counseling at risk gifted learners Educating Gifted Students in Middle School focuses on creative practical and realistic school solutions that create a vital and responsive community for all students **Resources in Education** ,1999-04
