**Reconceptualising Professional Learning** Tara Fenwick, Monika Nerland, 2014-03-14 This book presents leading edge perspectives and methodologies to address emerging issues of concern for professional learning in contemporary society The conditions for professional practice and learning are changing dramatically in the wake of globalization new modes of knowledge production new regulatory regimes and increased economic political pressures In the wake of this a number of challenges for learning emerge more practitioners become involved in interprofessional collaboration developments in new technologies and virtual workworlds emergence of transnational knowledge cultures and interrelated circuits of knowledge The space and time relations in which professional practice and learning are embedded are becoming more complex as are the epistemic underpinnings of professional work

Together these shifts bring about intersections of professional knowledge and responsibilities that call for new conceptions of professional knowing Exploring what the authors call sociomaterial perspectives on professional learning they argue that theories that trace not just the social but also the material aspects of practice such as tools technologies texts but also bodies and actions are useful for coming to terms with the challenges described above Reconceptualising Professional Learning develops these issues through specific contemporary cases focused on one of the book's three main themes 1 professionals knowing in practice 2 professionals work arrangements and technologies or 3 professional responsibility Each chapter draws upon innovative theory to highlight the sociomaterial webs through which professional learning may be reconceptualised Authors are based in Australia Canada Italy Norway Sweden and the USA as well as the UK and their cases are based in a range of professional settings including medicine teaching nursing engineering social services the creative industries and more By presenting detailed accounts of these themes from a sociomaterial perspective the book opens new questions and methodological approaches These can help make more visible what is often invisible in today's messy dynamics of professional learning and point to new ways of configuring educational support and policy for professionals

**Time in Eternity** Robert John Russell, 2012-06-15 According to Robert John Russell one of the foremost scholars on relating Christian theology and science the topic of time and eternity is central to the relation between God and the world in two ways First it involves the notion of the divine eternity as the supratemporal source of creaturely time Second it involves the eternity of the eschatological New Creation beginning with the bodily Resurrection of Jesus in relation to creaturely time The key to Russell s engagement with these issues and the purpose of this book is to explore Wolfhart Pannenberg s treatment of time and eternity in relation to mathematics physics and cosmology Time in Eternity is the first book length exposition of Russell s unique method for relating Christian theology and the natural sciences which he calls creative mutual interaction CMI This method first calls for a reformulation of theology in light of science and then for the delineation of possible topics for research in science drawing on this reformulated theology Accordingly Russell first reformulates Pannenberg s discussion of the divine attributes eternity and omnipresence in light of the way time and space are treated in mathematics physics and cosmology This leads him to construct a correlation of eternity and omnipresence in light of the spacetime framework of Einstein s special relativity In the process he proposes a new flowing time interpretation of relativity to counter the usual block universe interpretation supported by most physicists and philosophers of science Russell also replaces Pannenberg s use of Hegel s concept of infinity in relation to the divine attributes with the concept of infinity drawn from the mathematics of Georg Cantor Russell then addresses the enormous challenge raised by Big Bang cosmology to Christian eschatology In response he draws on Pannenberg s interpretation both of the Resurrection as a proleptic manifestation of the eschatological New Creation within history and the present as the arrival of the future Russell shows how such a reformulated understanding of theology can shed light on possible directions for fundamental research in physics and cosmology These lead him to explore preconditions in contemporary physics research for the possibility of duration copresence retroactive causality and prolepsis in nature
