EBOOK: College Algebra with Trigonometry Raymond Barnett, Michael Ziegler, Karl Byleen, David Sobecki, 2010-03-16
Barnett Ziegler Byleen and Sobecki's College Algebra with Trigonometry text is designed to be user friendly and to maximize student comprehension by emphasizing computational skills ideas and problem solving as opposed to mathematical theory. The large number of pedagogical devices employed in this text will guide a student through the course. Integrated throughout the text, students and instructors will find Explore Discuss boxes which encourage students to think critically about mathematical concepts. In each section, the worked examples are followed by matched problems that reinforce the concept being taught. In addition, the text contains an abundance of exercises and applications that will convince students that math is useful. A MathZone site featuring algorithmic exercises, videos, and other resources accompanies the text. *College Algebra* Raymond A. Barnett, Michael R. Ziegler, Karl E. Byleen, 1998. Emphasizing computation skills, ideas, and problem solving rather than mathematical theory, this text omits most derivations and proofs except where significant. Each concept is illustrated with an example followed by a parallel problem and solution. Over 4200 graded problems are included. *College Algebra* John Tobey, J.
