Ethical Scenarios Children:

Ethical and Legal Issues in Counseling Children and Adolescents Teri Ann Sartor, Bill McHenry, Jim McHenry, 2016-07-01 *Ethical and Legal Issues in Counseling Children and Adolescents* provides counselors and other professionals with clinical cases and accurate up to date information on both ethical standards and case law Chapters take a comprehensive developmental approach to legal and ethical decision making when counseling children and adolescents one that presents each chapter topic from the perspective of an adult and then explores accommodations important to children and adolescents The book is a vital resource for faculty who recognize the limited scope with which other texts cover the topic and for practitioners looking to better understand the legal and ethical concerns around working with young people

Case Studies in Abnormal Child and Adolescent Psychology Robert Weis, 2020-09-03 *Case Studies in Abnormal Child and Adolescent Psychology* is designed to accompany the textbook *Introduction to Abnormal Child and Adolescent Psychology* by Robert Weis Clinical case examples based on real children and parents pair with chapters in the core text to illustrate principles of developmental psychopathology psychological assessment evidence based treatment and examples of specific disorders prevalent in children and adolescents These brief cases modeled after the same format as DSM 5 clinical cases are paired with a series of discussion questions that can be used as in class activities discussion starters writing assignments or exam questions

Ethical Issues in Mental Health Research With Children and Adolescents Kimberly Hoagwood, Peter S. Jensen, Celia B. Fisher, 2014-06-03 *Studies involving children with mental emotional or behavioral problems or their families have to meet certain standards of research ethics* This book contains chapters on the kinds of ethical dilemmas that typically occur in different types of studies of children and then presents 65 real world cases from experts who study children's mental health These experts offer practical suggestions for how to handle these dilemmas Chapters on the perspectives of parents regulators and bioethicists provide additional points of view on these issues Written in down to earth language this book will be useful for professionals who study children for those who train students in research methods and for parents who are thinking about participating in research studies In attempting to bridge the apparent gap between ethics and science the editors close this volume on a note commonly sounded by researchers more research is needed Yet in this area a new kind of research is required The science of scientific ethics must be developed and expanded and better understanding of the determinants and circumstances under which children can comprehend and evaluate risks and benefits is needed Likewise fuller knowledge of the contextual factors affecting children's and families' consent to participate in research is essential In particular development of scales to assess children's ability to comprehend risk benefit issues studies of families' reactions to research procedures and empirical data on the impact of various forms of participant reimbursement will advance both science and ethics This volume should spur further research serving as a guide for current investigators participating families institutional review boards and policymakers who shape the research enterprise

Research Katherine Guttmann,Michelle Shouldice,Alex V. Levin,2018-10-26 This book serves as a comprehensive resource for researchers and regulatory bodies working to establish sound evidence bases through research for the care of children and families affected by abuse Issues such as consent anonymous research and how to interface with the legal system in terms of disclosure and sharing of results are discussed in depth Ethical Issues in Child Abuse Research also provides insights into questions of ethics in animal research perpetrator and retrospective research and balances the necessity of collecting this valuable information while protecting vulnerable populations and respecting their privacy while interacting in a complex legal system With input from many leaders in child abuse research this book fills a critical need providing readers with a pathway to apply these principles of ethics to their own research in this challenging field *Ethics in Child Health* Michael D. Shields,Jonathan P. Fleming,Lucy K. Shields,2020-02-13 Should every child be vaccinated before being allowed to go to school Should children be allowed to refuse medical treatment even if it might save their life Does the fetus or unborn child have any rights Is it acceptable for a child s family to demand an expensive treatment despite uncertain benefits If you are a healthcare professional involved in the care of children how would you even begin to approach these dilemmas This book provides a unique resource it is a concise practical case based interactive workbook which will help the reader critically think about and approach ethical problems in child health Its key features include an introduction to medical ethics in child health a method to approach clinical ethical dilemmas interactive case studies and thought provoking discussions It will be particularly helpful for undergraduate medical and nursing students post graduate paediatric trainees paediatric nurses and allied health professionals **Resolving Ethical Dilemmas** Bernard Lo,2009-01-01 This timely resource offers clinicians expert guidance in approaching a wide range of ethical dilemmas and developing an action plan This edition includes a new chapter on ethical issues in cross cultural medicine and new material on conscientious objection by physicians in reproductive health and other areas *Ethical Issues in Cancer Patient Care* Peter Angelos,2013-04-17 This book addresses a variety of ethical issues that arise in the care of oncology patients Many volumes have been written on medical ethics in the past 30 years However few have focused on ethical issues specific to the care of cancer patients This book brings together such a focused examination The contributors are experienced clinicians ethicists medical humanists and medical educators The issues raised have direct relevance to the care of oncology patients in treatment as well as research settings The chapters address issues that are central to contemporary medical practice and medical ethics inquiry Any practicing clinician will be well aware of the problems of communication and how uncertainty cross cultural issues and religious influences can impact patient care The limits of care and the role of advance directives and palliative care are common issues that must be addressed in treating patients at the end of life For oncologists and oncology patients participation in clinical trials may be a thorny topic especially when phase I clinical trials are being considered The impact of managed care and reimbursement issues cannot be avoided in the contemporary patient care and similarly cannot be neglected when considering the ethical

ramifications raised No discussion of ethics in oncology can be complete without attention to the specific challenges raised by the pediatric patient with cancer All of these topics are explored by the contributors to this book **Contemporary Ethical Dilemmas in Assisted Reproduction** Francoise Shenfield, Claude Sureau, 2021-09-22 Ethical dilemmas are more common in assisted reproduction than in any other area of medicine Providing a framework for discussing and articulating to patients the topical issues in assisted reproduction this text examines the ever changing interaction between ethics society and scientific advances in the area This third volume of ethical debates includes chapters on assisted reproduction for parents with HIV and Hep C posthumous reproduction and non Christian religious ethics in relation to assisted reproduction

Ethical Issues in Maternal-Fetal Medicine Donna Dickenson, 2002-02-07 This book addresses the ethical problems in maternal fetal medicine which impact directly on clinical practice **Ethical Issues in Community-based Research with Children and Youth** Bonnie J. Ross Leadbeater, Elizabeth Bannister, Cecilia Benoit, Anne Marshall, Mikael Jansson, Ted Riecken, 2006-01-01 Efforts to apply ethical guidelines and regulations to vulnerable populations are often problematic Consequently health and social scientists sometimes shy away from the challenges of research particularly when it means addressing value laden social problems such as sexuality drugs and racism Ethical Issues in Community Based Research with Children and Youth is a collection of essays that describe the uniqueness of community based research outlining several of the ethical concerns that it engenders The contributors examine such issues as the scope of informed consent to multiple stakeholders determining competence to give consent in marginalized populations and managing dual roles as participant researchers The collection suggests that a more collaborative ongoing and discursive approach is needed by researchers and by ethical review boards to ensure that research on sensitive social problems with high risk populations is supported and also conducted with a clear understanding of the highest ethical standards possible
